01

Introduction and overview

- Research methodology
- Background and objective
- Assessment framework
- Scope and coverage

Our research methodology is based on four pillars of strength to produce actionable and insightful research for the industry

Proprietary tracking and database of operating costs, labor pool, market activity, and risks (updated annually)

Year-round tracking of 300+ locations around the world

Large repository of existing research on offshore, nearshore, and onshore locations across regions (APAC, Europe, North America, LATAM, and Africa)

Over 30 years of experience advising clients on strategic IT, business services, engineering services, and sourcing

Executive-level relationships with buyers, providers, technology providers, and industry associations

Background and objective

With globalization, businesses are expanding their operations to different parts of the world, and it is becoming increasingly important to communicate with customers in their native language. While English is broadly viewed as the lingua franca of business, global companies are able to expand their market reach effectively to different countries by operating in different languages. Over the past decade, the demand for speakers of European languages has increased manifold; and while nearshore European countries can be leveraged for services delivery, there can be some potential business tradeoffs (e.g., higher cost of operations). Today, European language speakers are globally spread and, hence, organizations need not limit themselves to just Europe for services delivery in European languages.

This Everest Group handbook supports organizations in their efforts to identify the right locations for delivering services in European languages. It highlights the relative attractiveness of key global locations, based on a holistic and multi-faceted assessment. At an overall level, this handbook covers the languages delivery attractiveness assessed on the following parameters:

Parameters considered for assessment of overall language-location attractiveness

Assessment framework (page 1 of 2)

This handbook assesses the attractiveness of key locations for language-based services delivery

- **Language scalability potential:** reflects the potential number of global services professionals that can be hired over the next 12 months across all levels of seniority (in a typical delivery pyramid), on a market average basis, with a steady state market scenario and on the condition that other organizations are not starting to hire very aggressively in the local market
 - Actual numbers may vary based on company-specific factors such as brand positioning, attrition, salaries offered, career growth practices, and other policies
 - Estimates provided correspond to those at an overall global services level and not specific to any service line / industry; requirement of technical/functional skills with language skills will decrease scalability
- **Language proficiency:** ability of global services professionals in a country to use and understand a language at a certain level/degree. We rate the proficiency at the levels mentioned below:

| Delivery language – levels of proficiency | | | Comments |
|---|----|--------------------|--|
| A Basic user | A1 | Beginner | <ul style="list-style-type: none">• Understand and use familiar, day-to-day expressions• Interact, provided others speak slowly and clearly |
| | A2 | Elementary | <ul style="list-style-type: none">• Understand sentences and frequently used expressions (e.g., personal or family introductions, shopping)• Use simple words/phrases to explain his/her background |
| B Independent user | B1 | Intermediate | <ul style="list-style-type: none">• Stronger understanding, can respond to standard scenarios encountered at work• Emerging ability to convey domain-specific information |
| | B2 | Upper-intermediate | <ul style="list-style-type: none">• Can understand complex/domain-intensive information in the field of specialization• Can interact with a good degree of fluency and spontaneity |
| C Proficient user | C1 | Advanced | <ul style="list-style-type: none">• Can communicate fluently and spontaneously• Use language flexibly and effectively for professional or social purposes |
| | C2 | Proficient | <ul style="list-style-type: none">• Can understand and summarize information from both written and spoken sources, reconstruct arguments, etc.• Coherent presentation of domain knowledge |

Assessment framework (page 2 of 2)

This handbook assesses the attractiveness of key locations for language-based services delivery

- **Salary premium over English language:** corresponds to typical market average salary premiums for supporting global services delivery in a non-native language – these premiums are applied over and above the English language delivery. Company-specific salary premiums may vary
- **Proportion of locals vs. expats:** mix of locals and expats supporting global services delivery in a specific language
- **Operating and business environment:** includes assessment of the broader set of external factors and conditions that directly or indirectly impacts the day-to-day operations or overall performance and strategy of a business or organization
 - **Operating environment:** favorability of drivers impacting the global services enabling ecosystem:
 - ◆ General infrastructure: availability of basic infrastructure needed to support business operations; based on factors such as availability and transparency of real estate, ease of connectivity, and availability of utilities
 - ◆ Ease of remote working: current status of digital readiness, IT penetration, availability of co-working spaces, and innovation potential to scale services
 - ◆ Safety and security: susceptibility to natural disasters and business cost of crime and violence
 - ◆ Quality of life: ability to access favorable healthcare facilities, education system, and environment
 - **Business environment:** favorability of business-related considerations essential to support growth in the global services arena:
 - ◆ Macroeconomic stability: risks affecting the country's stability such as macroeconomic risks, financial risks, and country-credit risks
 - ◆ Geopolitical stability: risks affecting the country's stability such as external interventions and political risks
 - ◆ Regulatory environment and ease of doing business: legal and regulatory hurdles to business operations

Scope and coverage

| Eight European languages... | | | | | | | |
|-----------------------------|--------|--------|---------|--------|------------|---------|---------|
| Dutch | French | German | Italian | Polish | Portuguese | Russian | Spanish |

...across 23 countries have been assessed in detail

| Latin America (LATAM) | | Middle East and Africa (MEA) | | Asia Pacific (APAC) | |
|---|---|---|---|--|---|
|  Argentina |  Colombia |  Egypt |  Morocco |  India |  Malaysia |
|  Costa Rica |  Mexico | | |  Philippines |  Vietnam |
| Central and Eastern Europe (CEE) | | | | Western Europe | |
|  Bulgaria |  Czech Republic |  Greece |  Hungary |  Lithuania | |
|  Poland |  Romania |  Slovakia |  Turkey |  Ireland |  Portugal |
| | | | |  Scotland |  Spain |

Detailed assessment of languages

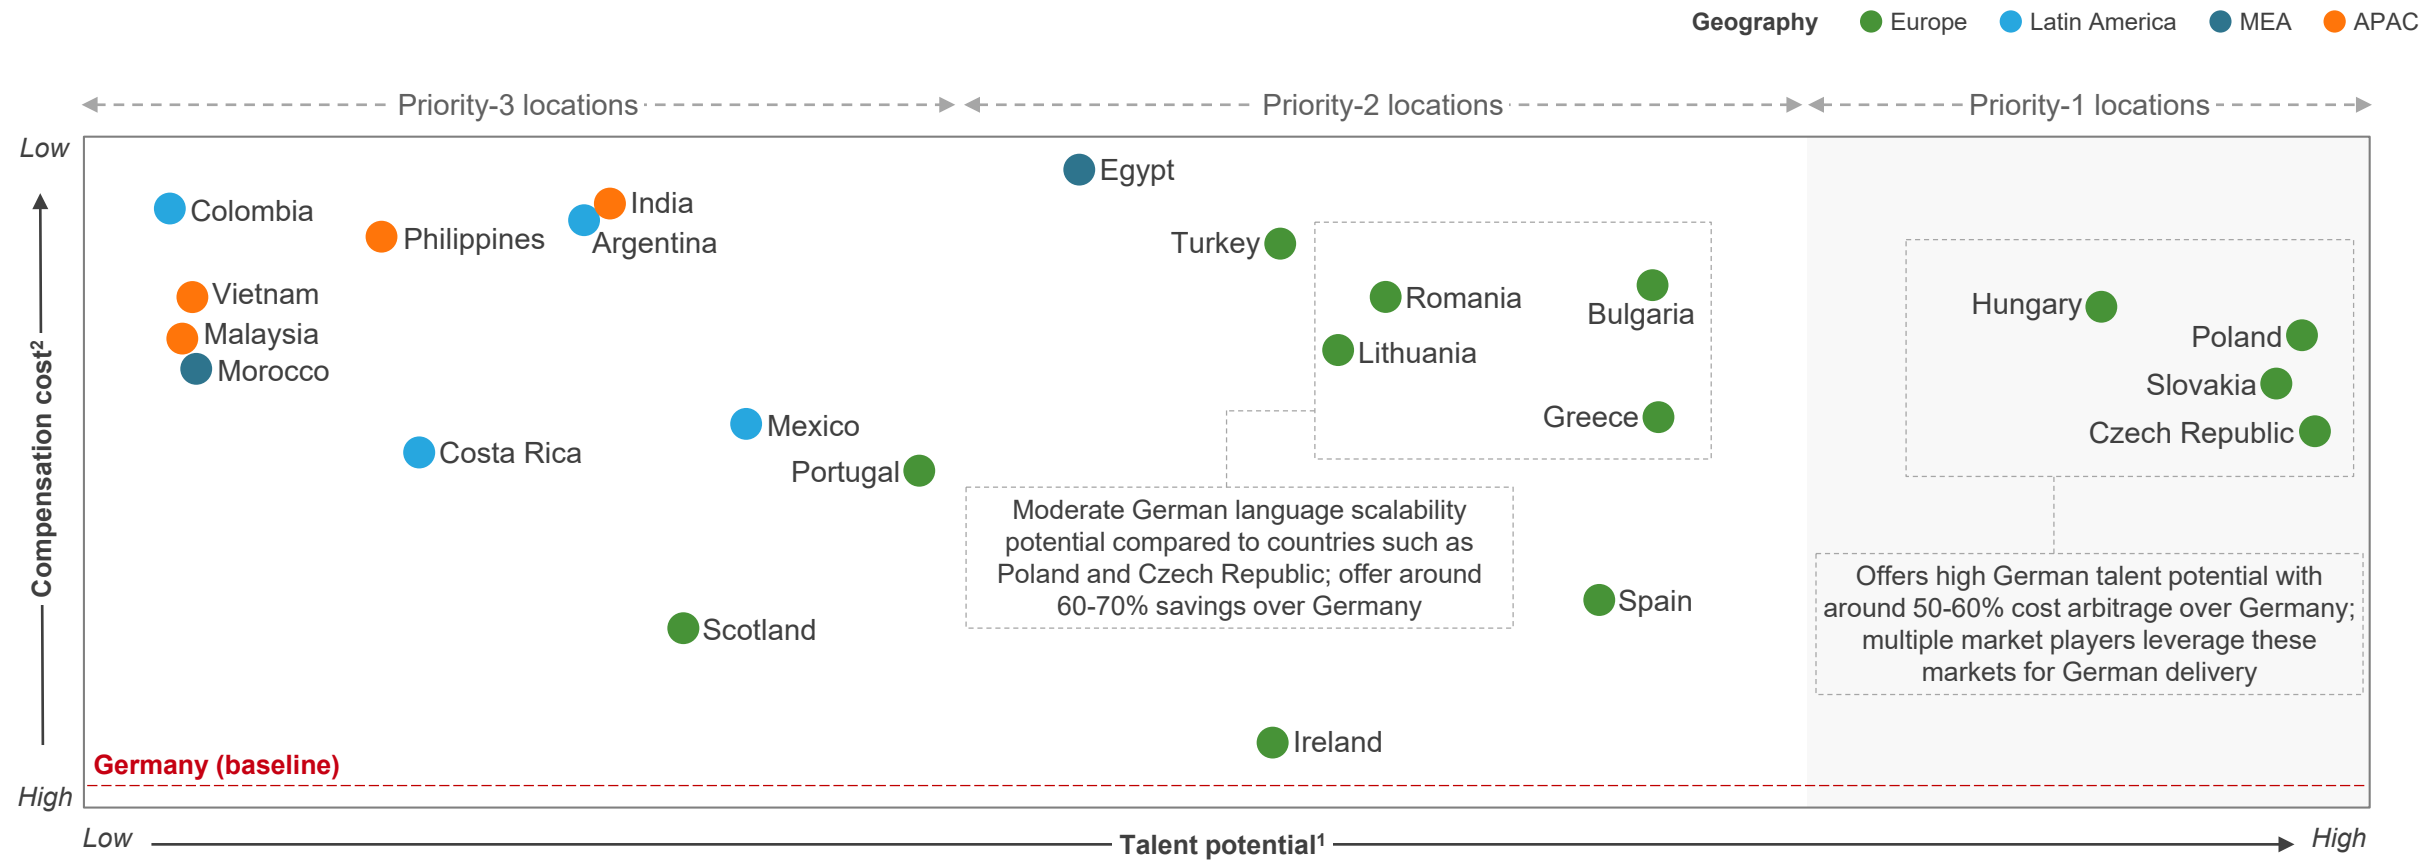

- German
- Dutch
- Spanish
- Russian
- French
- Italian
- Portuguese
- Polish

3A

German

Language summary | German

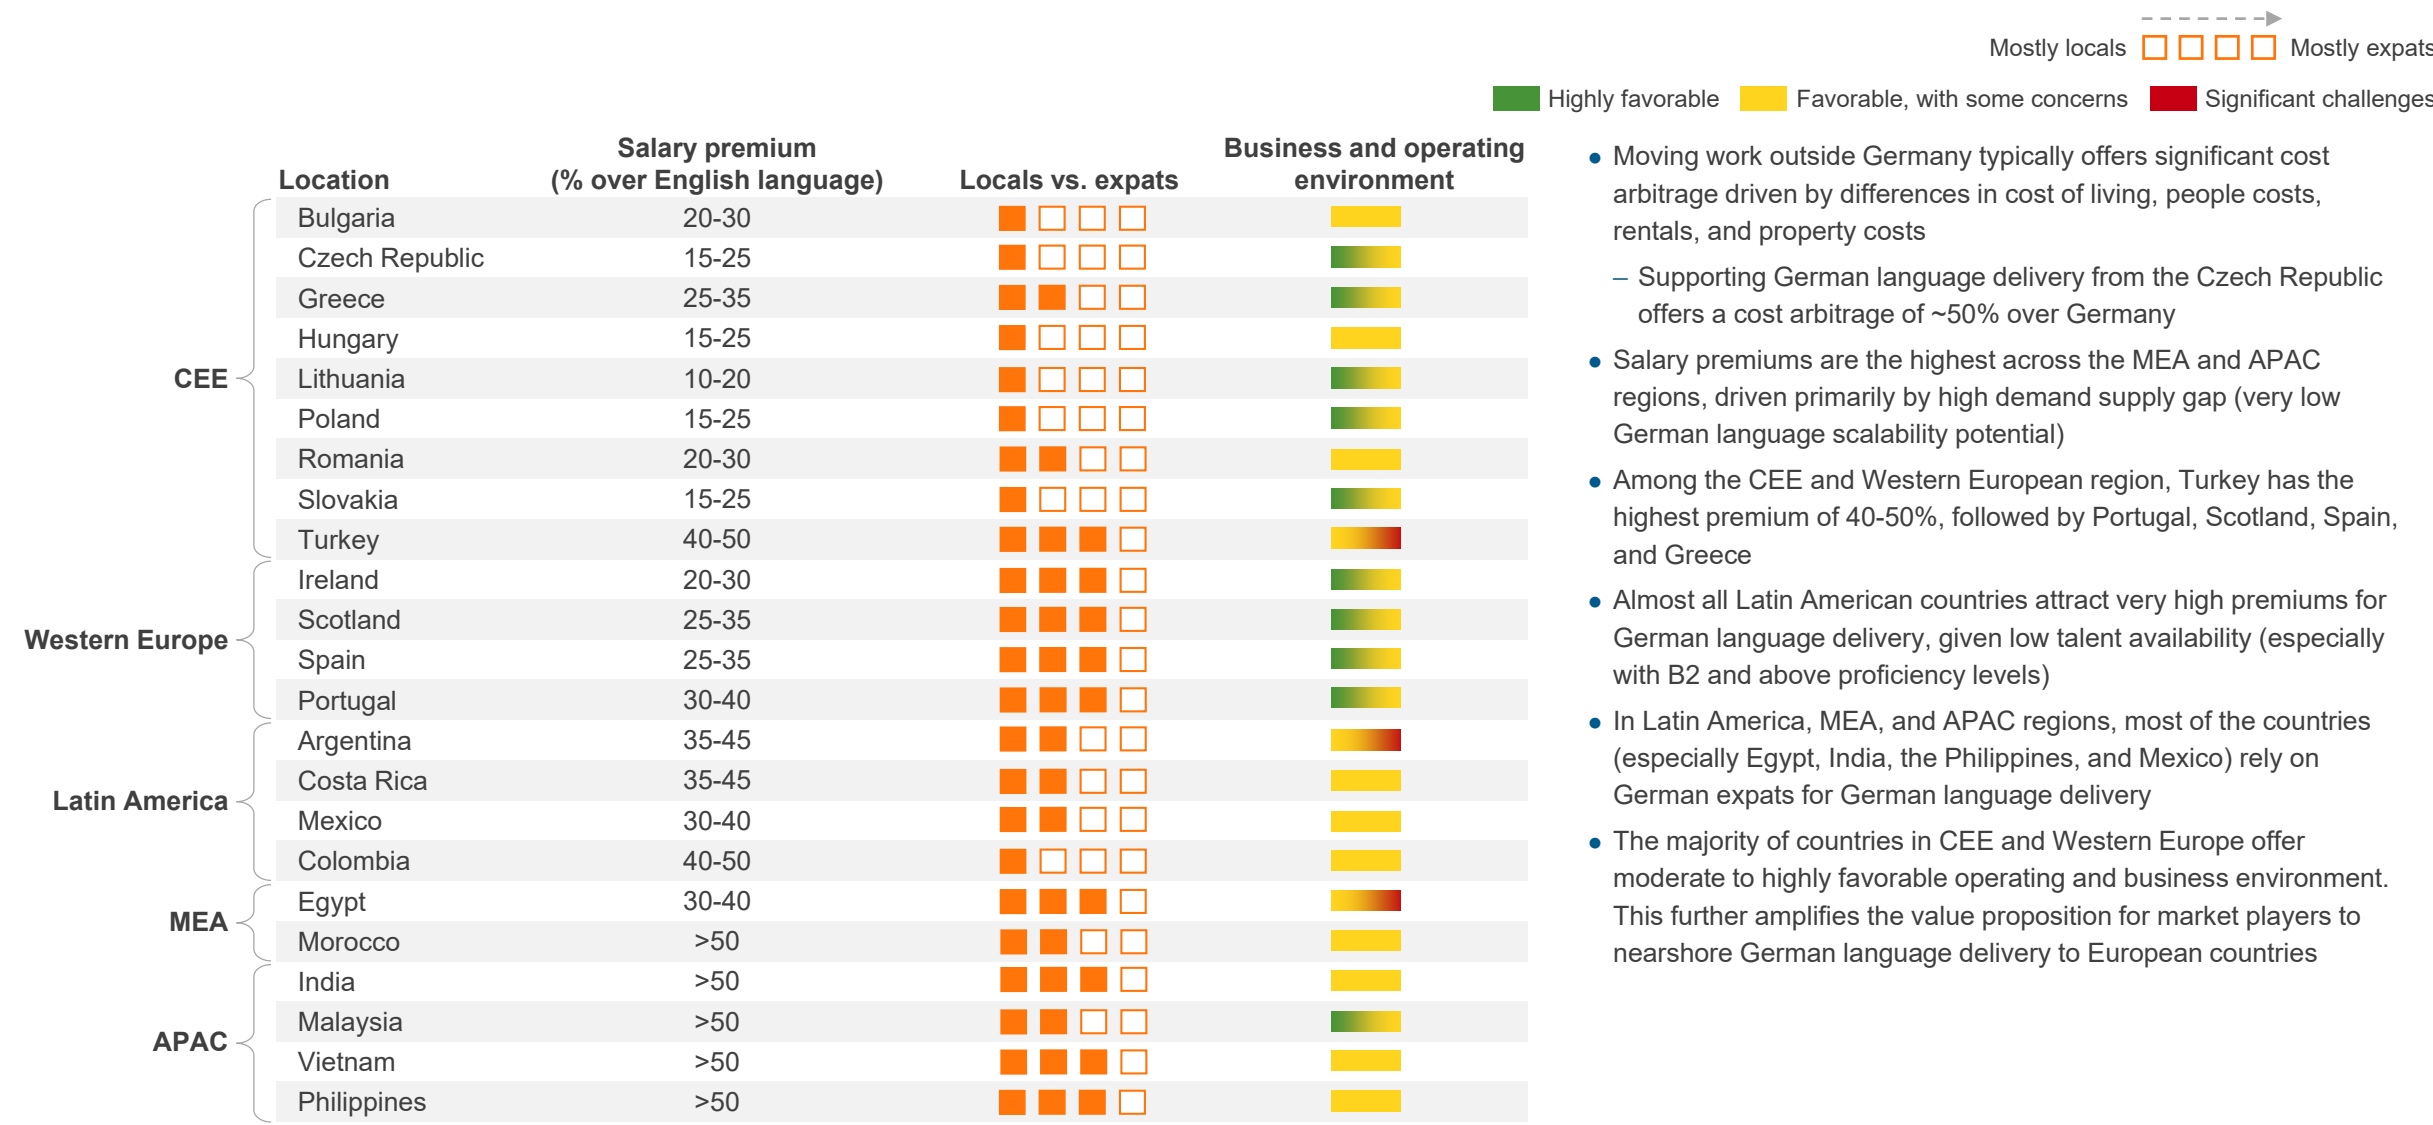

1 Talent potential is a composite metric comprising the following factors: a) annual language scalability potential and b) language proficiency in the location
2 Reflective of market average compensation for global delivery of IT-BP services in a specific language
Source: Everest Group (2023)

Language skill assessment | German (page 1 of 2)

Language skill assessment | German (page 2 of 2)

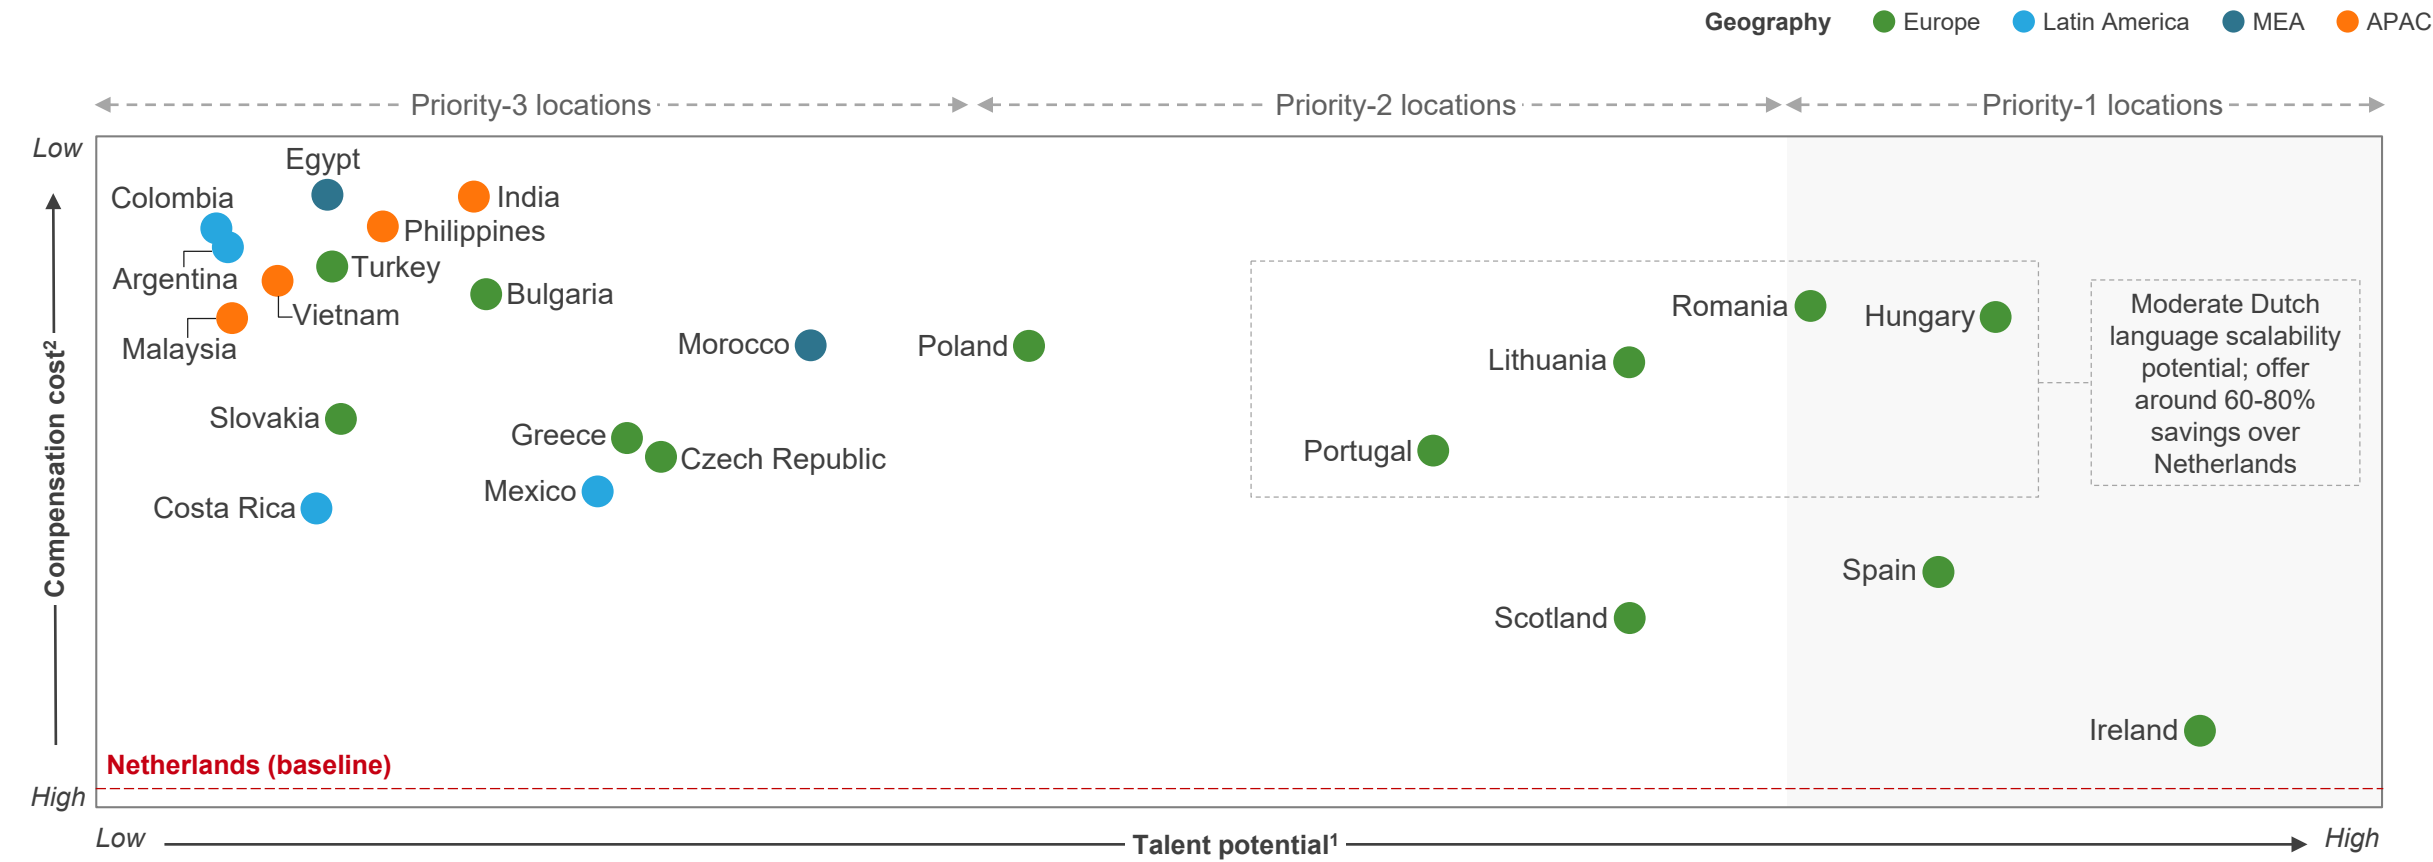

3B

Dutch

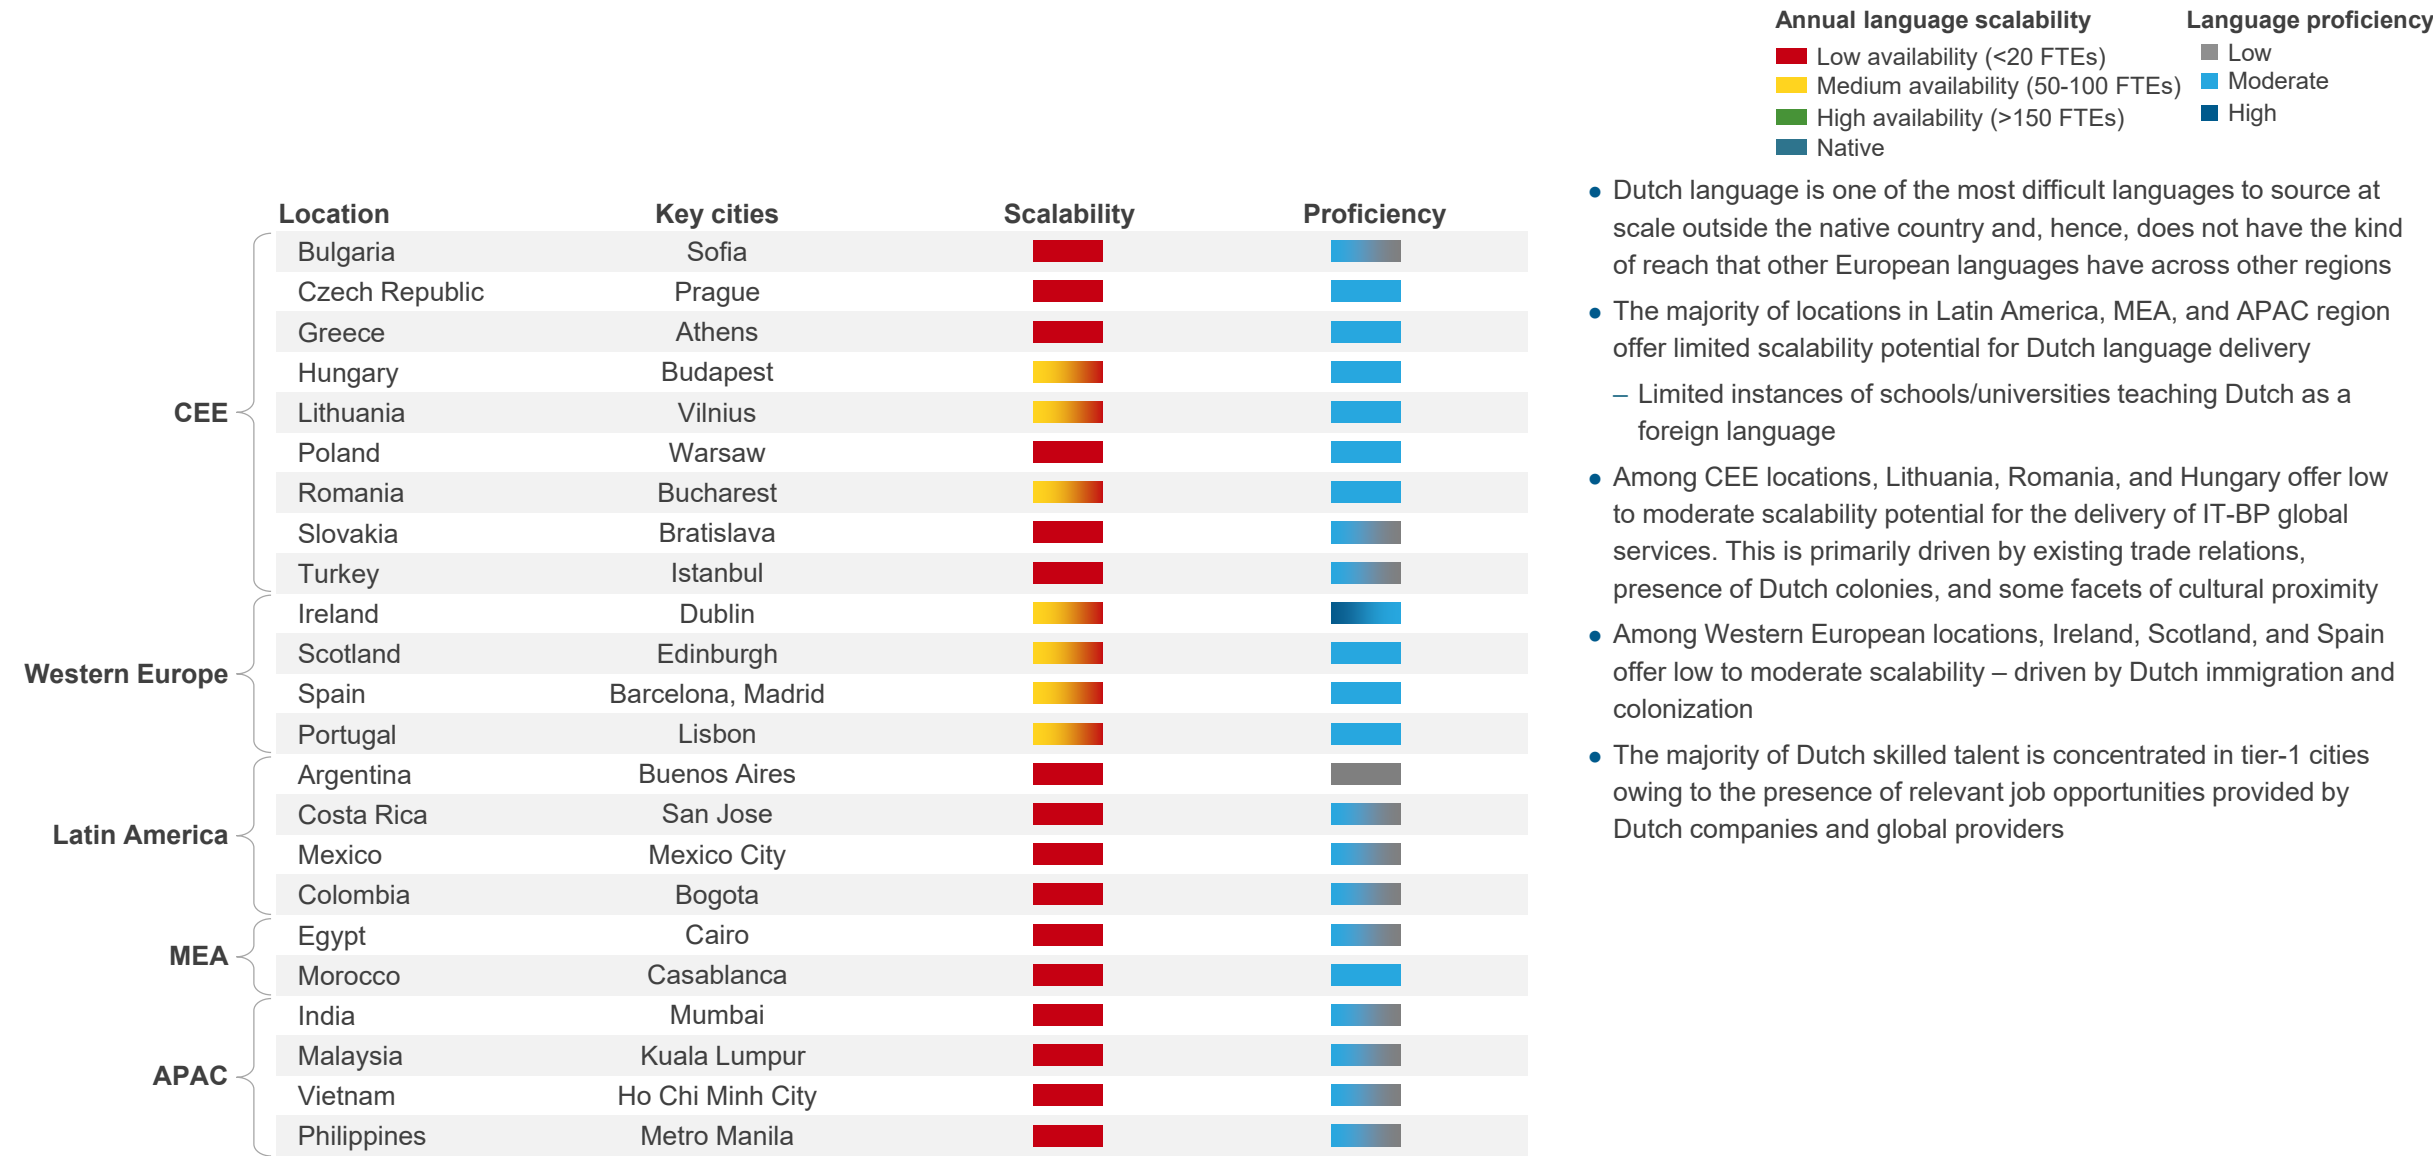

Language summary | Dutch

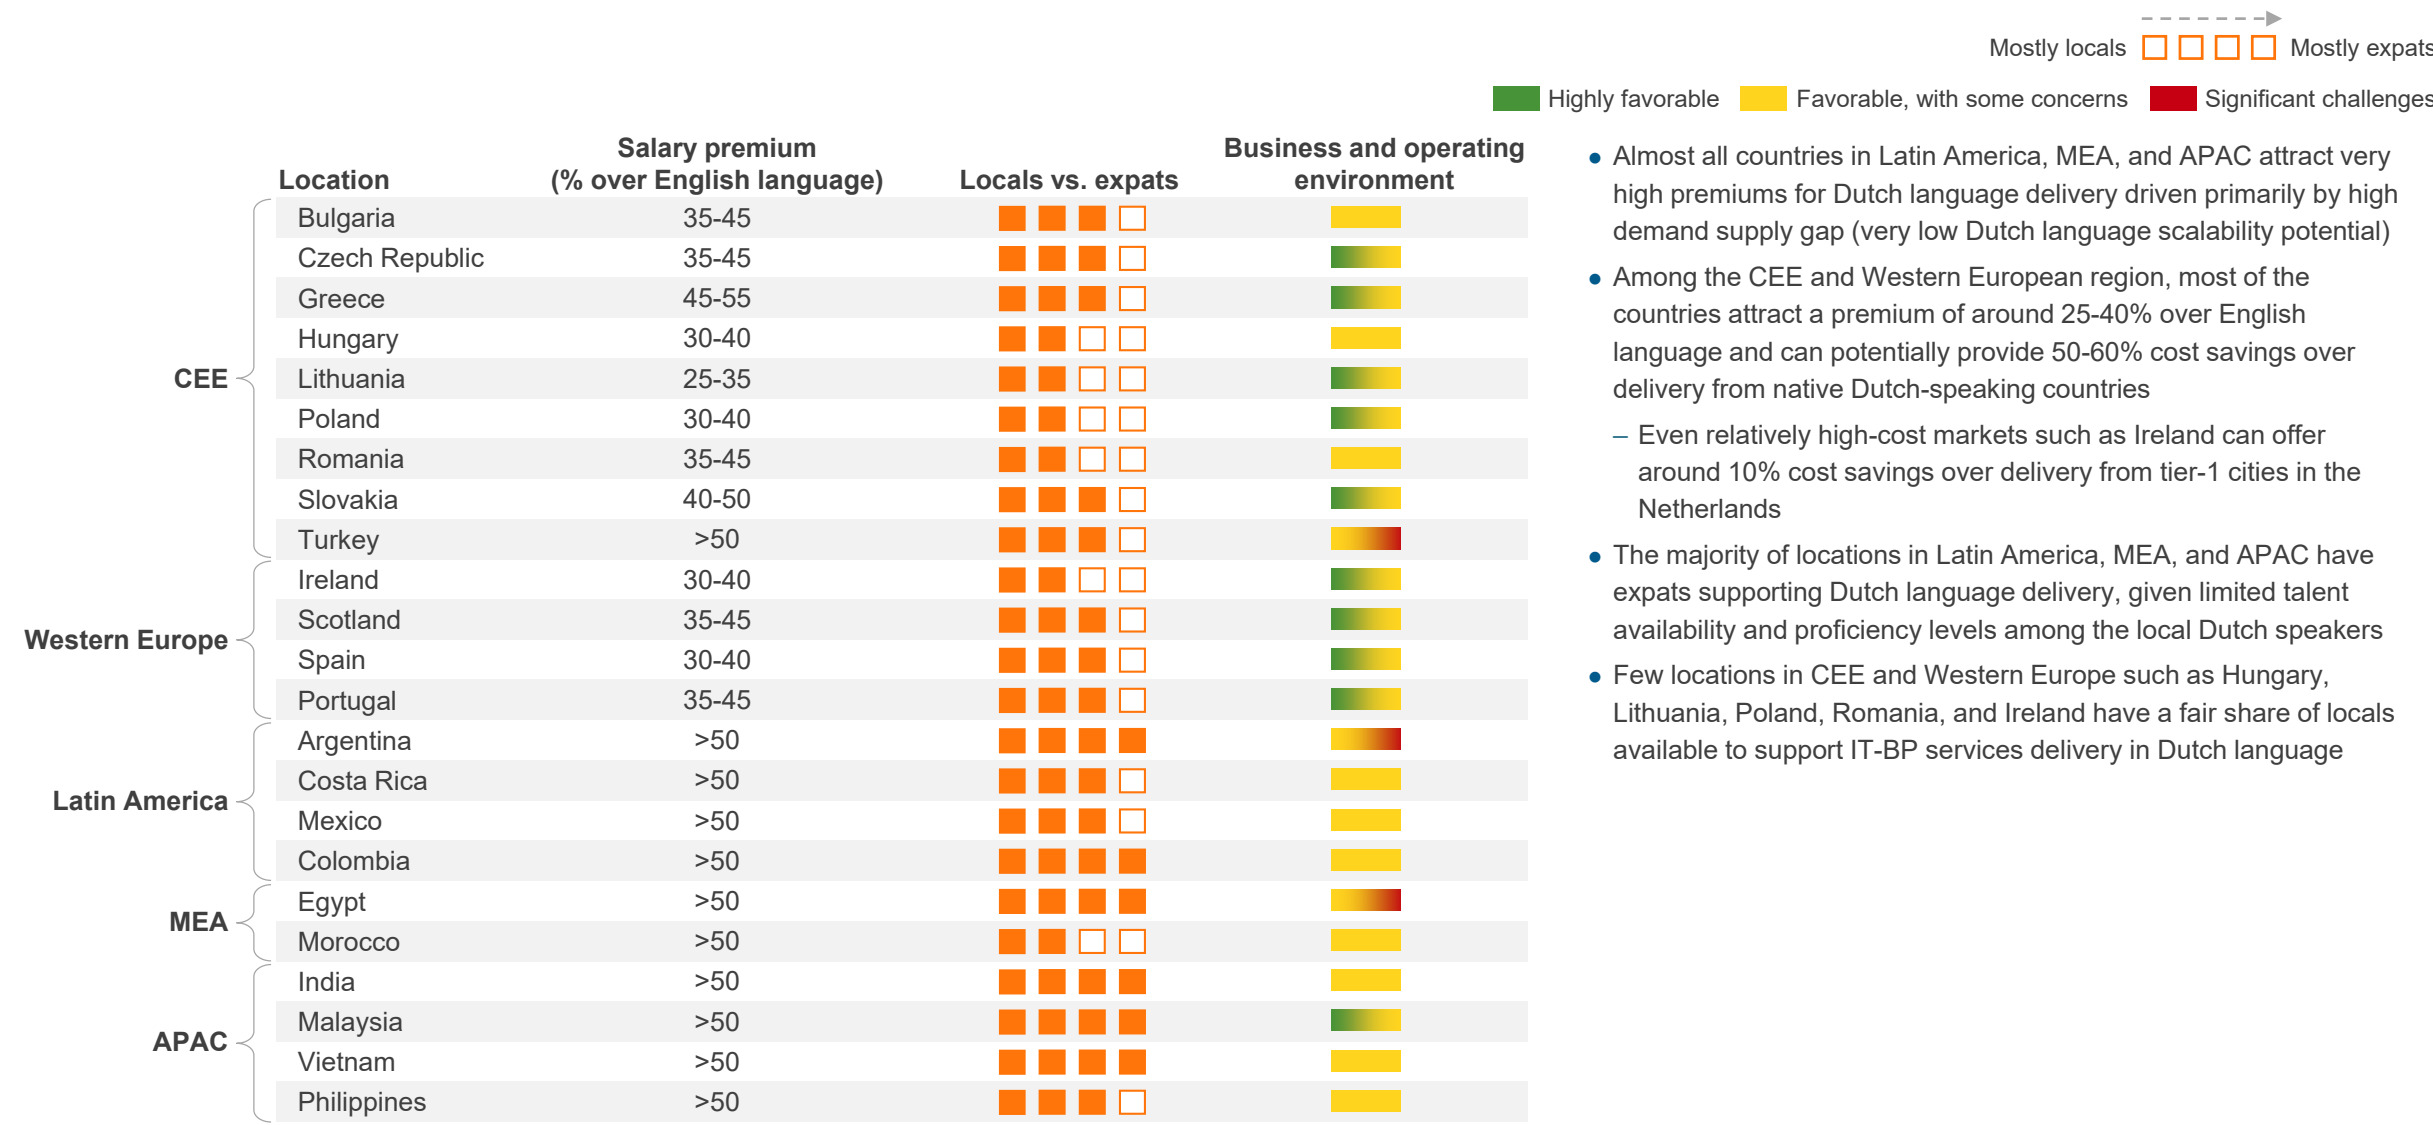

1 Talent potential is a composite metric comprising the following factors: a) annual language scalability potential and b) language proficiency in the location
2 Reflective of market average compensation for global delivery of IT-BP services in a specific language
Source: Everest Group (2023)

Language skill assessment | Dutch (page 1 of 2)

Language skill assessment | Dutch (page 2 of 2)

3C

Spanish

Language summary | Spanish

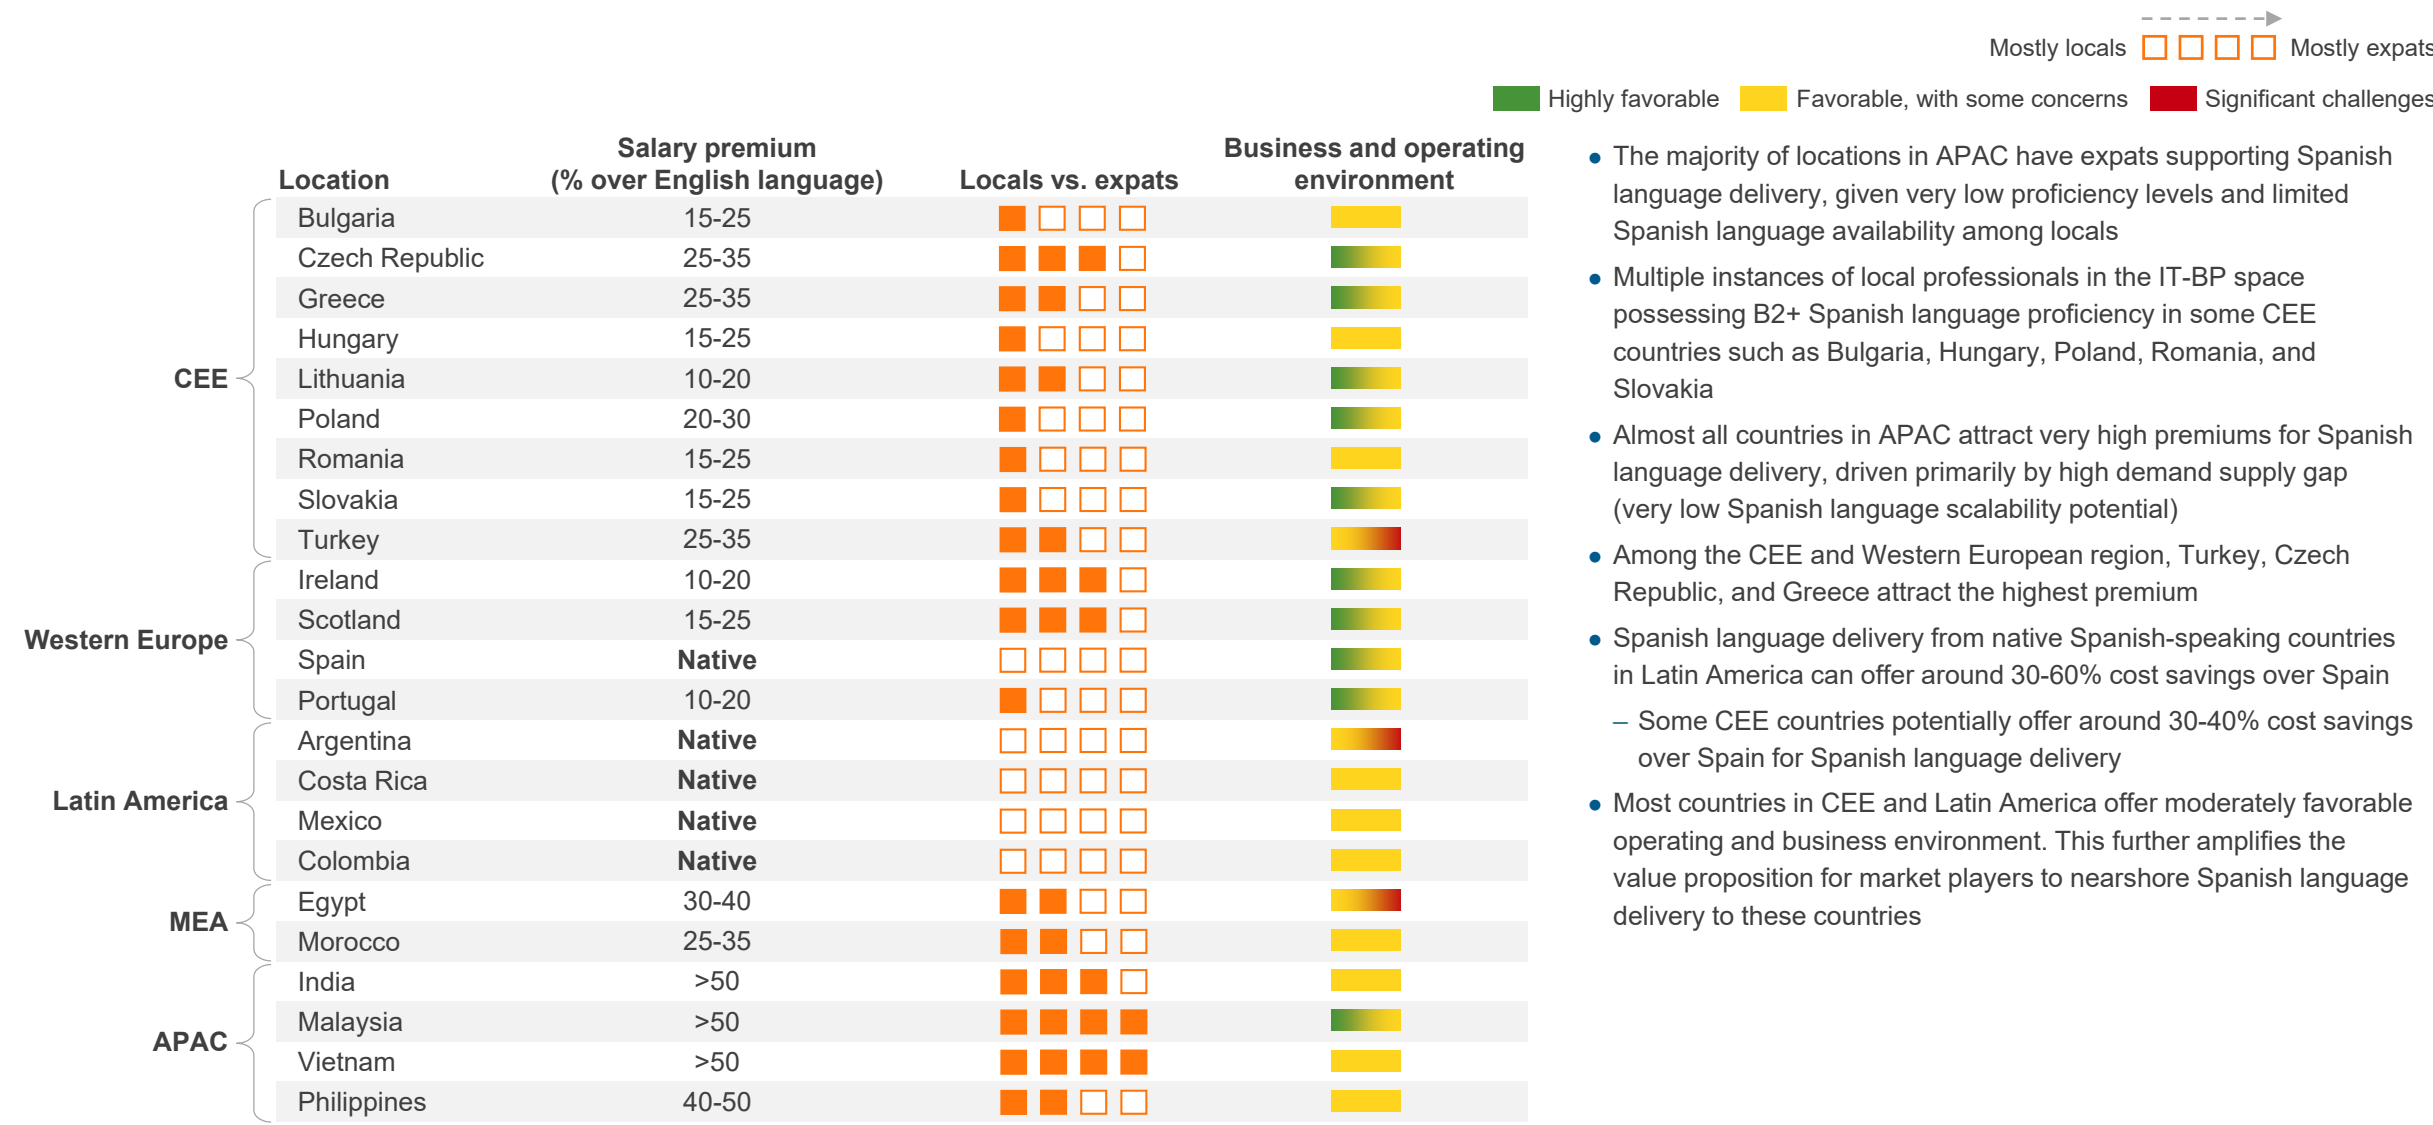

1 Talent potential is a composite metric comprising the following factors: a) annual language scalability potential and b) language proficiency in the location
2 Reflective of market average compensation for global delivery of IT-BP services in a specific language
Source: Everest Group (2023)

Language skill assessment | Spanish (page 1 of 2)

- Other than Spain, Spanish is also the native language in multiple Latin American countries – given Spain’s colonization in multiple South American countries after Columbus discovered the New World
- Evidence of multiple accent variations between Spain and Latin American Spanish – primarily driven by pronunciation, grammar, and vocabulary differences
 - Argentinian Spanish is different from Spanish in other Latin American countries
 - Global services organizations and clients face limited business challenge due to differences in Spanish accent
- Among Western European countries, Portugal offers moderate to high scalability potential for Spanish language delivery with multiple instances of professionals having C1/C2 proficiency levels
- This is primarily driven by the country’s geographical proximity to Spain
- Except Morocco and the Philippines, the majority of locations in MEA and APAC region offer limited scalability potential for Spanish language delivery
 - Owing to the bilateral relations between Morocco and Spain, both countries are evaluating ways to develop Spanish as a foreign language in Moroccan schools, mainly by strengthening the training of Spanish teachers

Language skill assessment | Spanish (page 2 of 2)

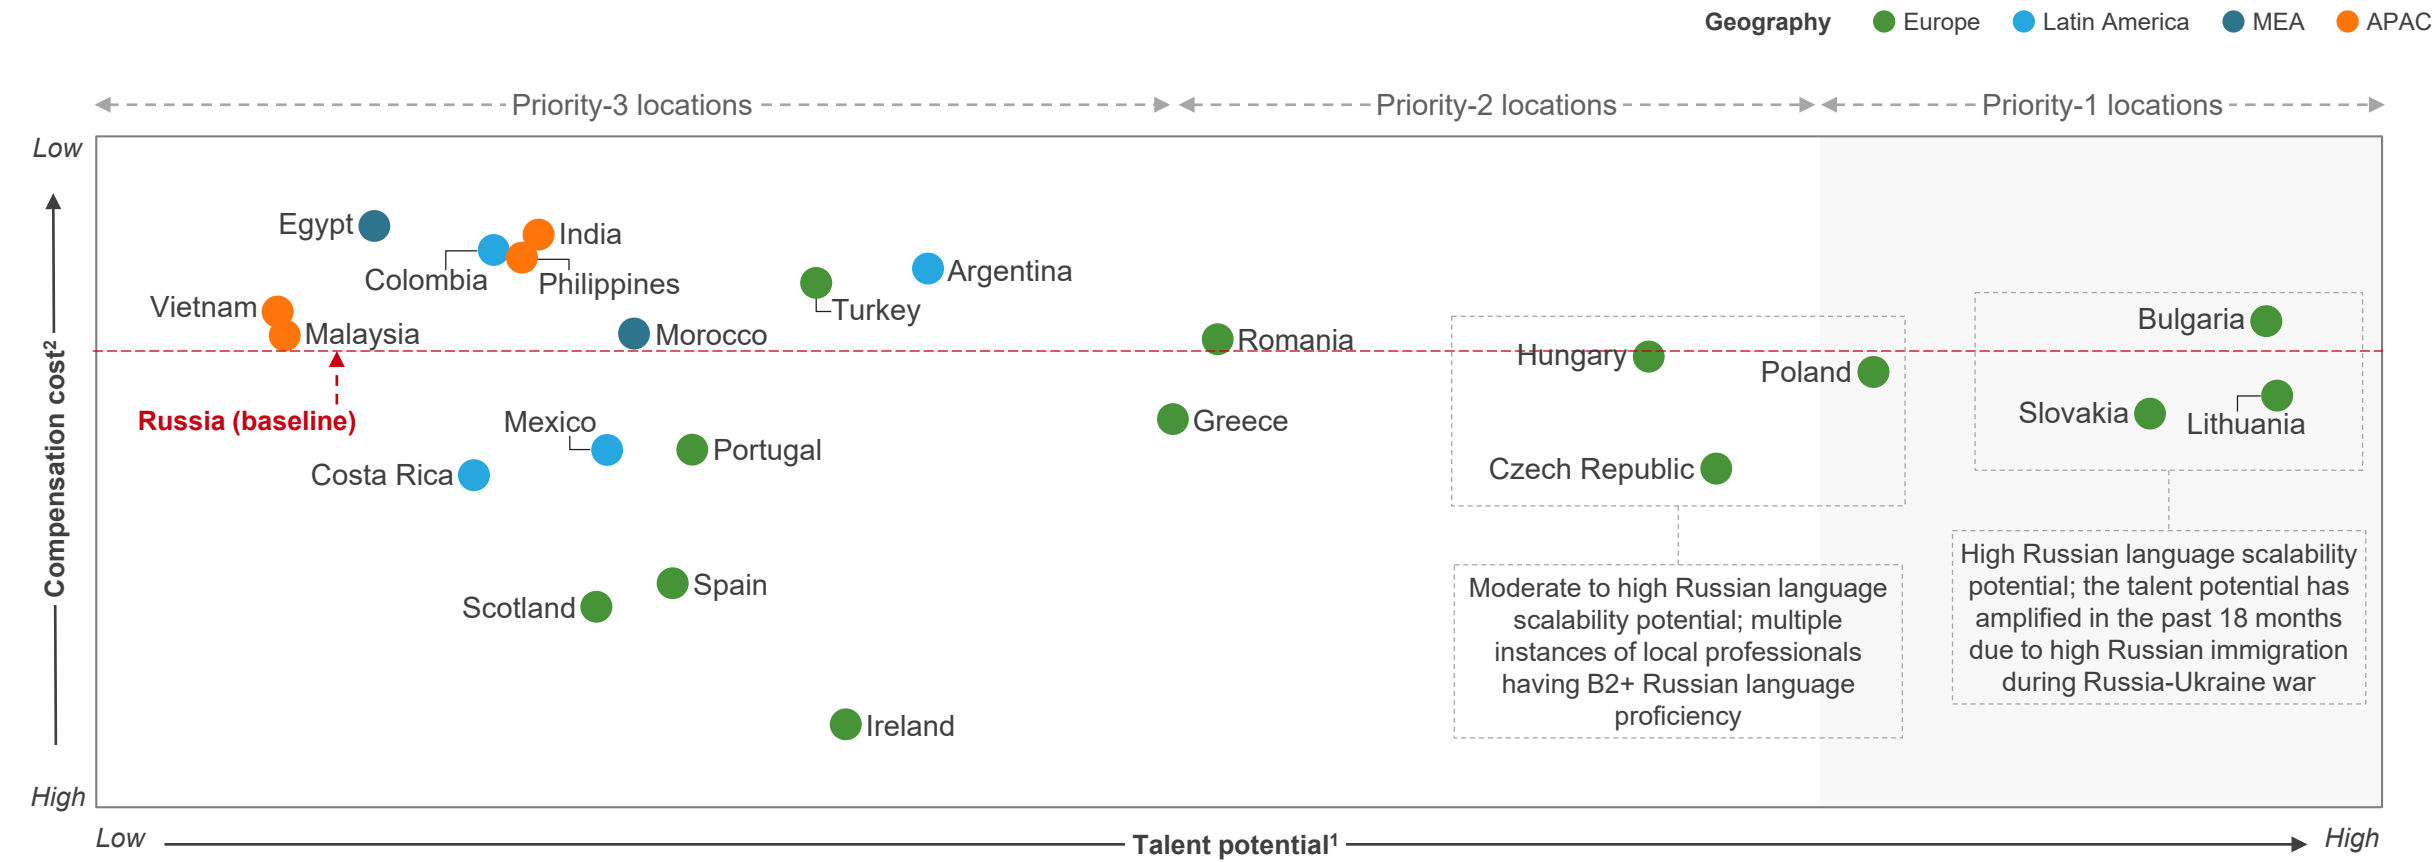

3D

Russian

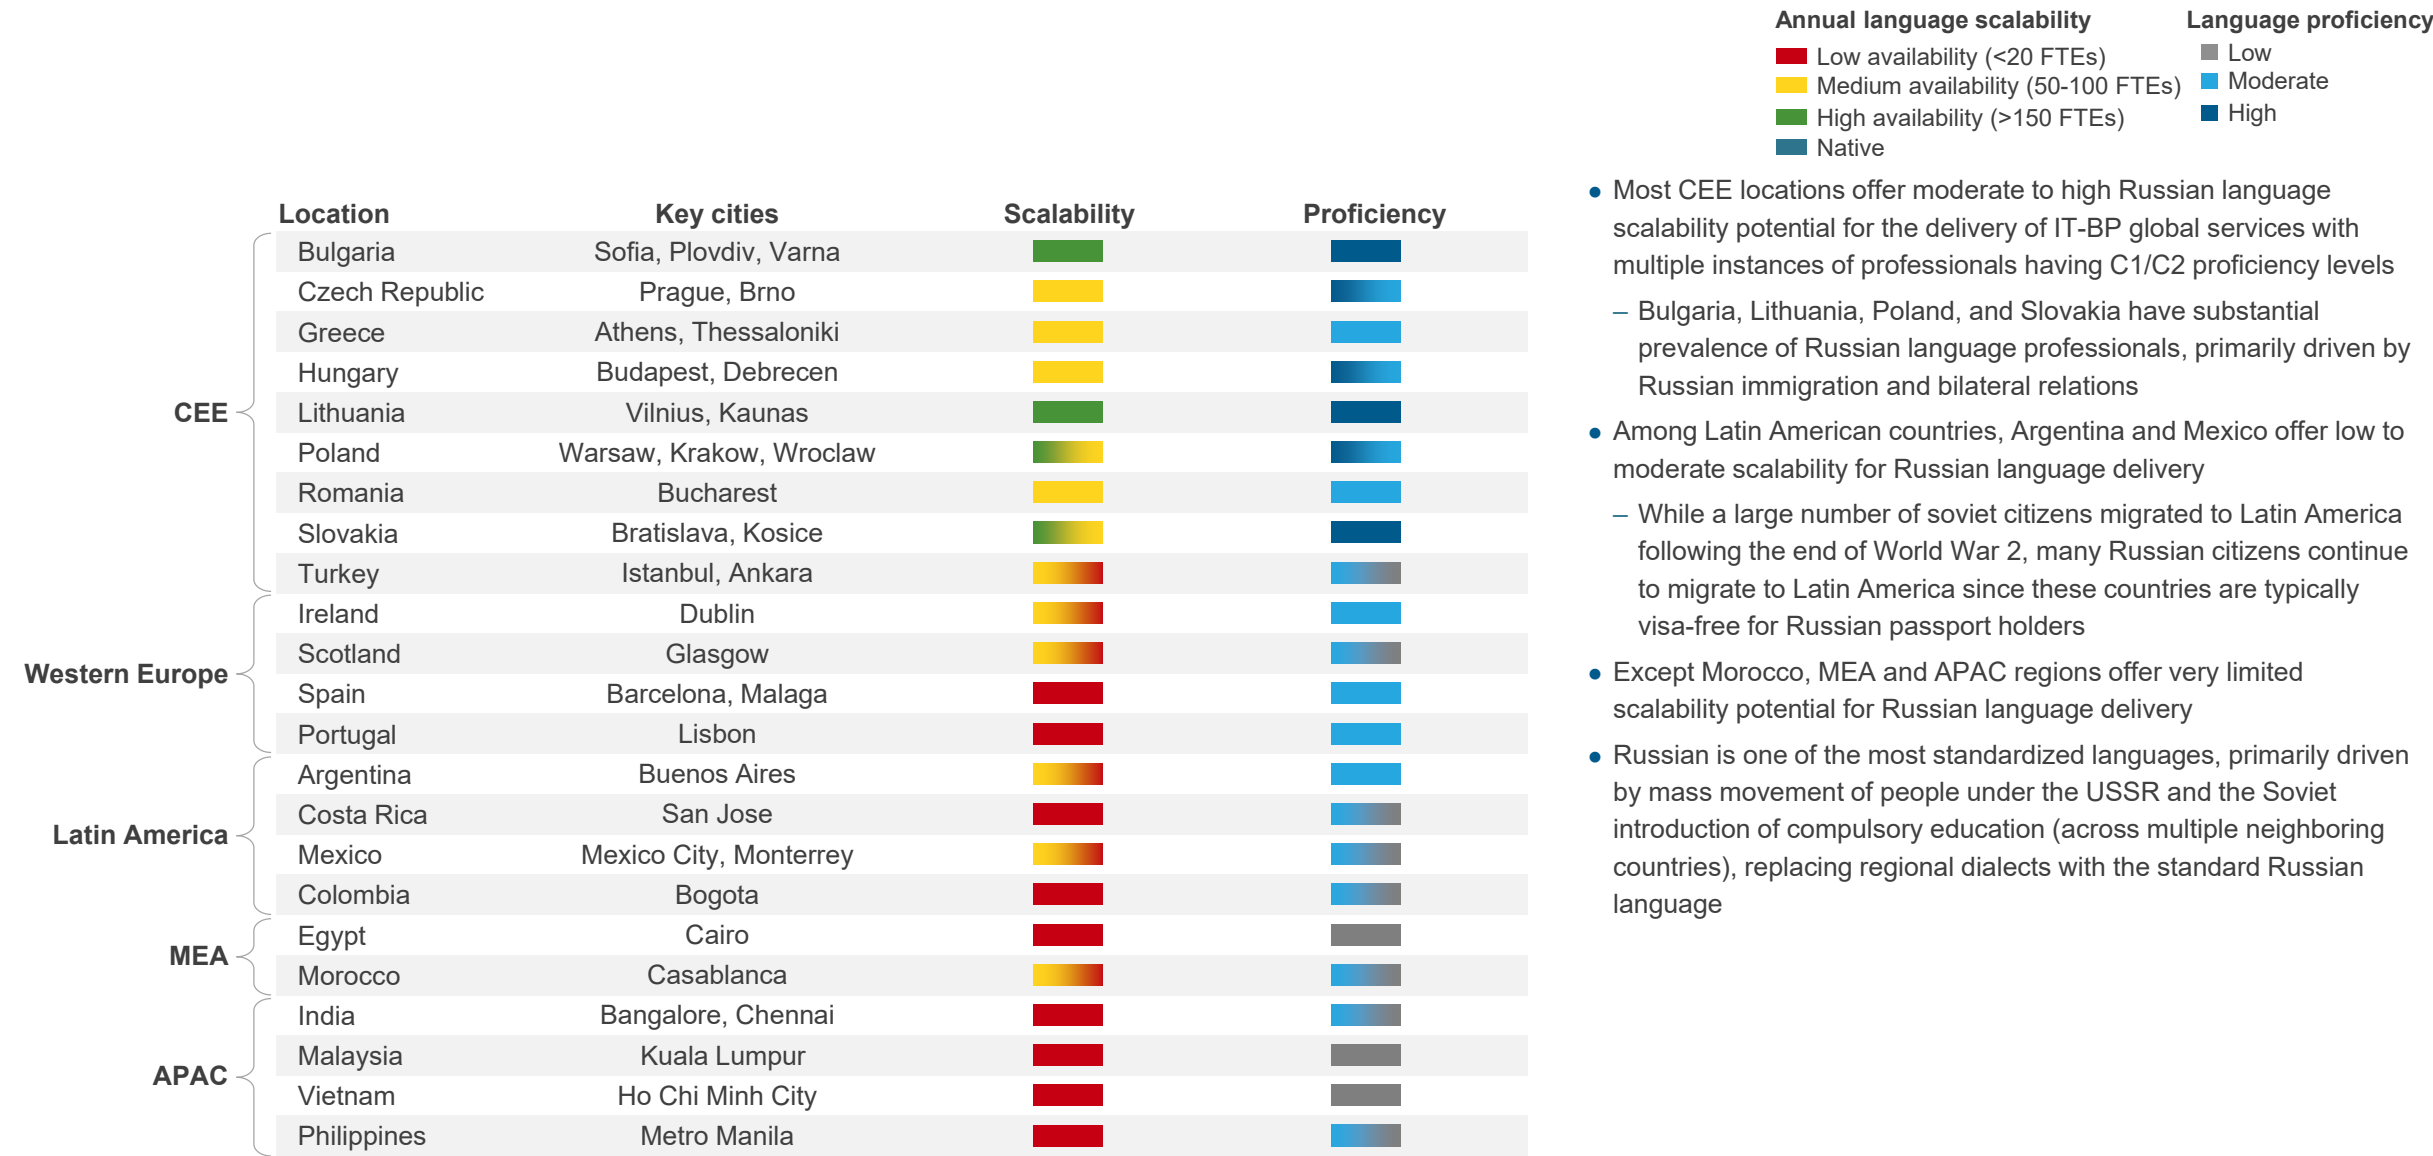

Language summary | Russian

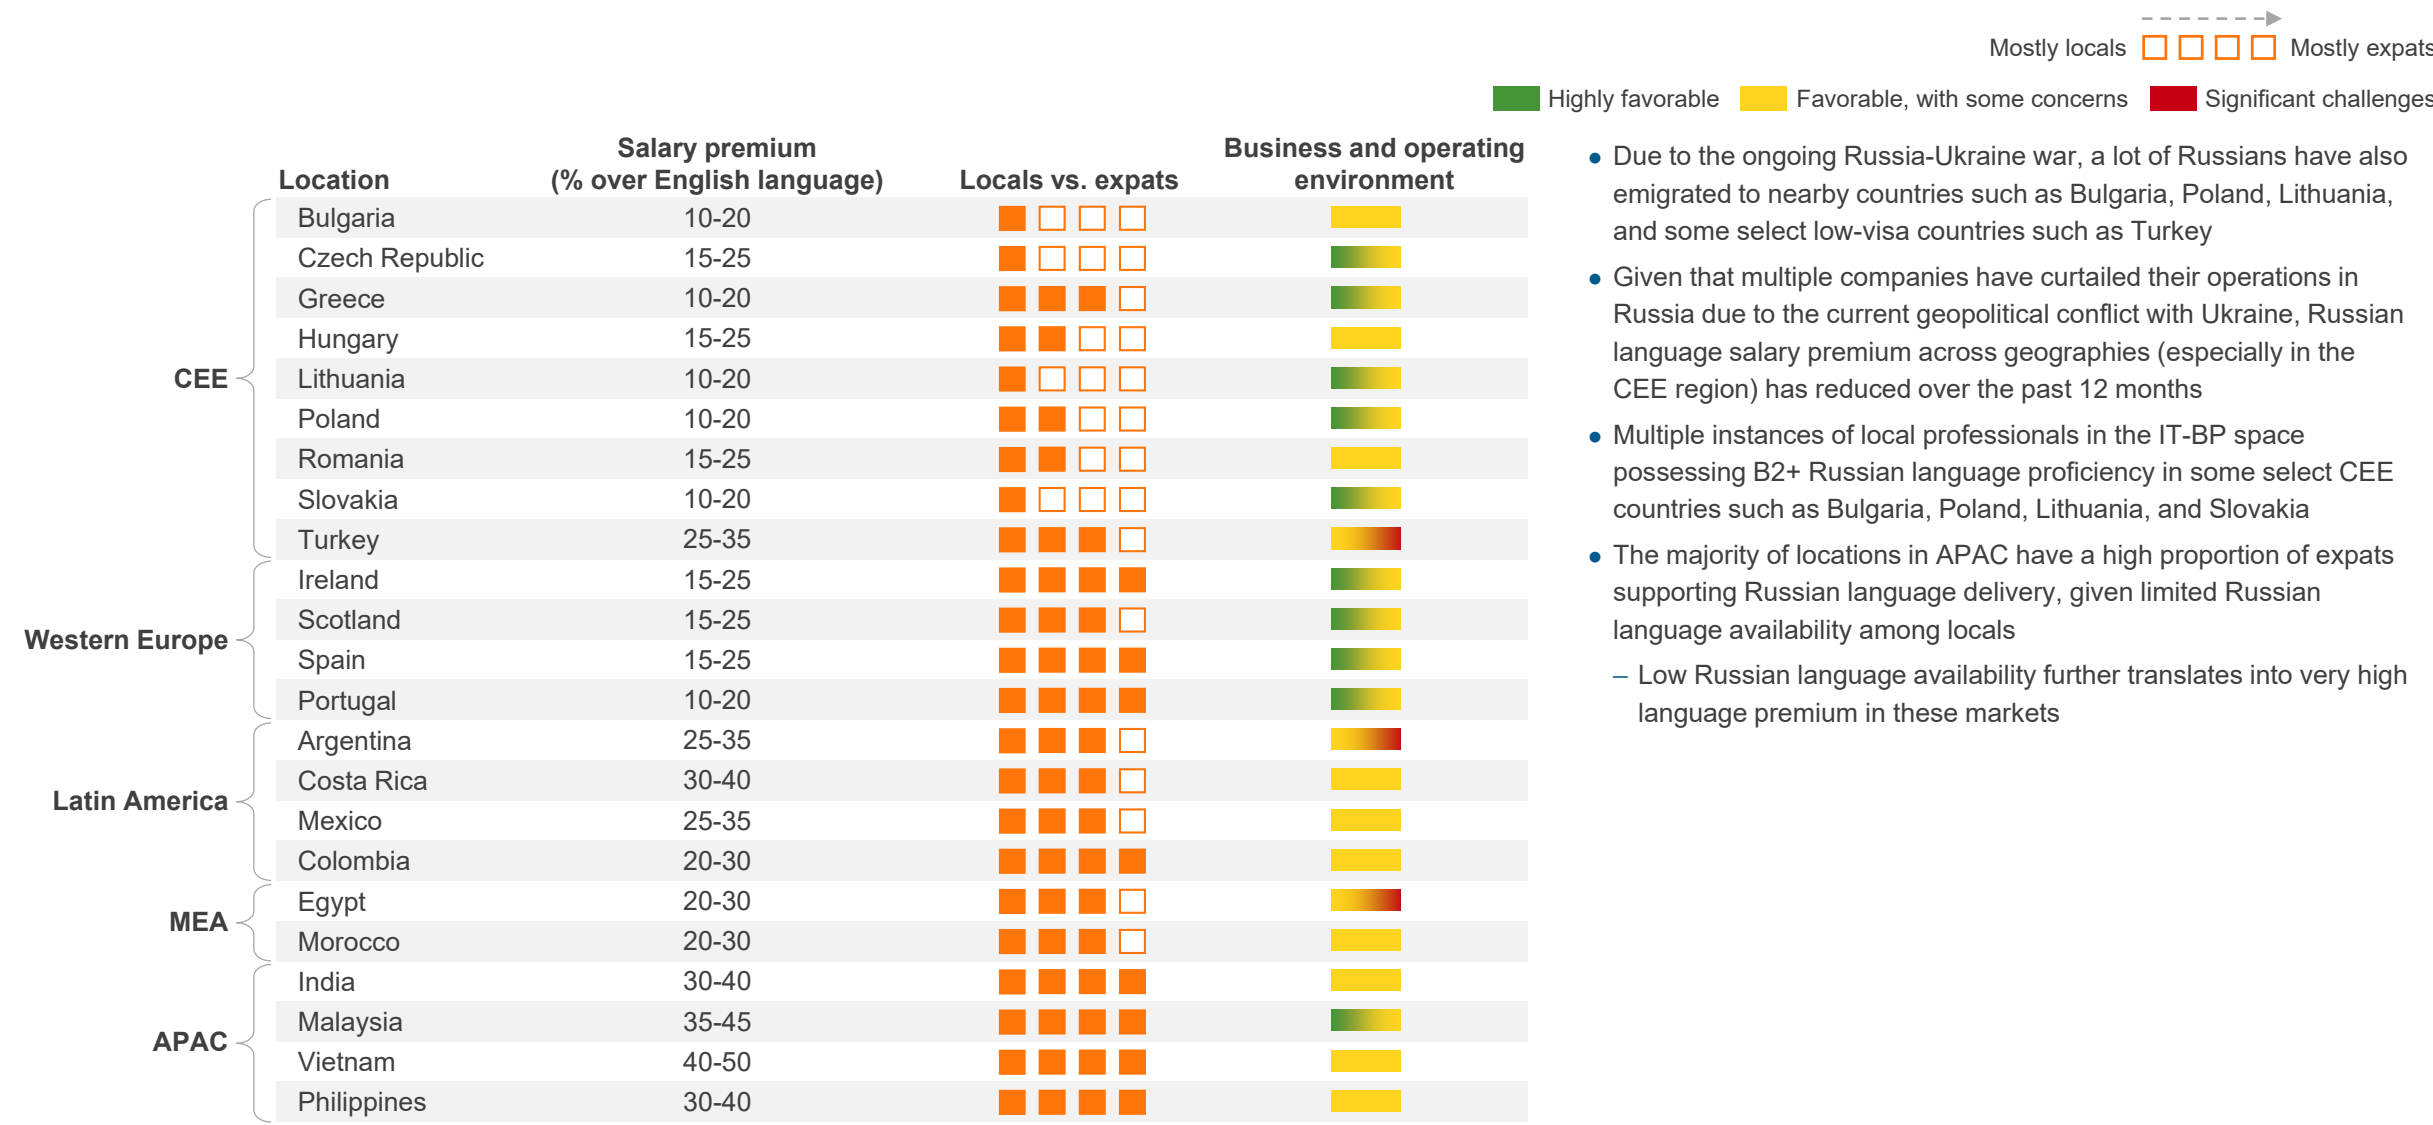

1 Talent potential is a composite metric comprising the following factors: a) annual language scalability potential and b) language proficiency in the location
2 Reflective of market average compensation for global delivery of IT-BP services in a specific language
Source: Everest Group (2023)

Language skill assessment | Russian (page 1 of 2)

Language skill assessment | Russian (page 2 of 2)

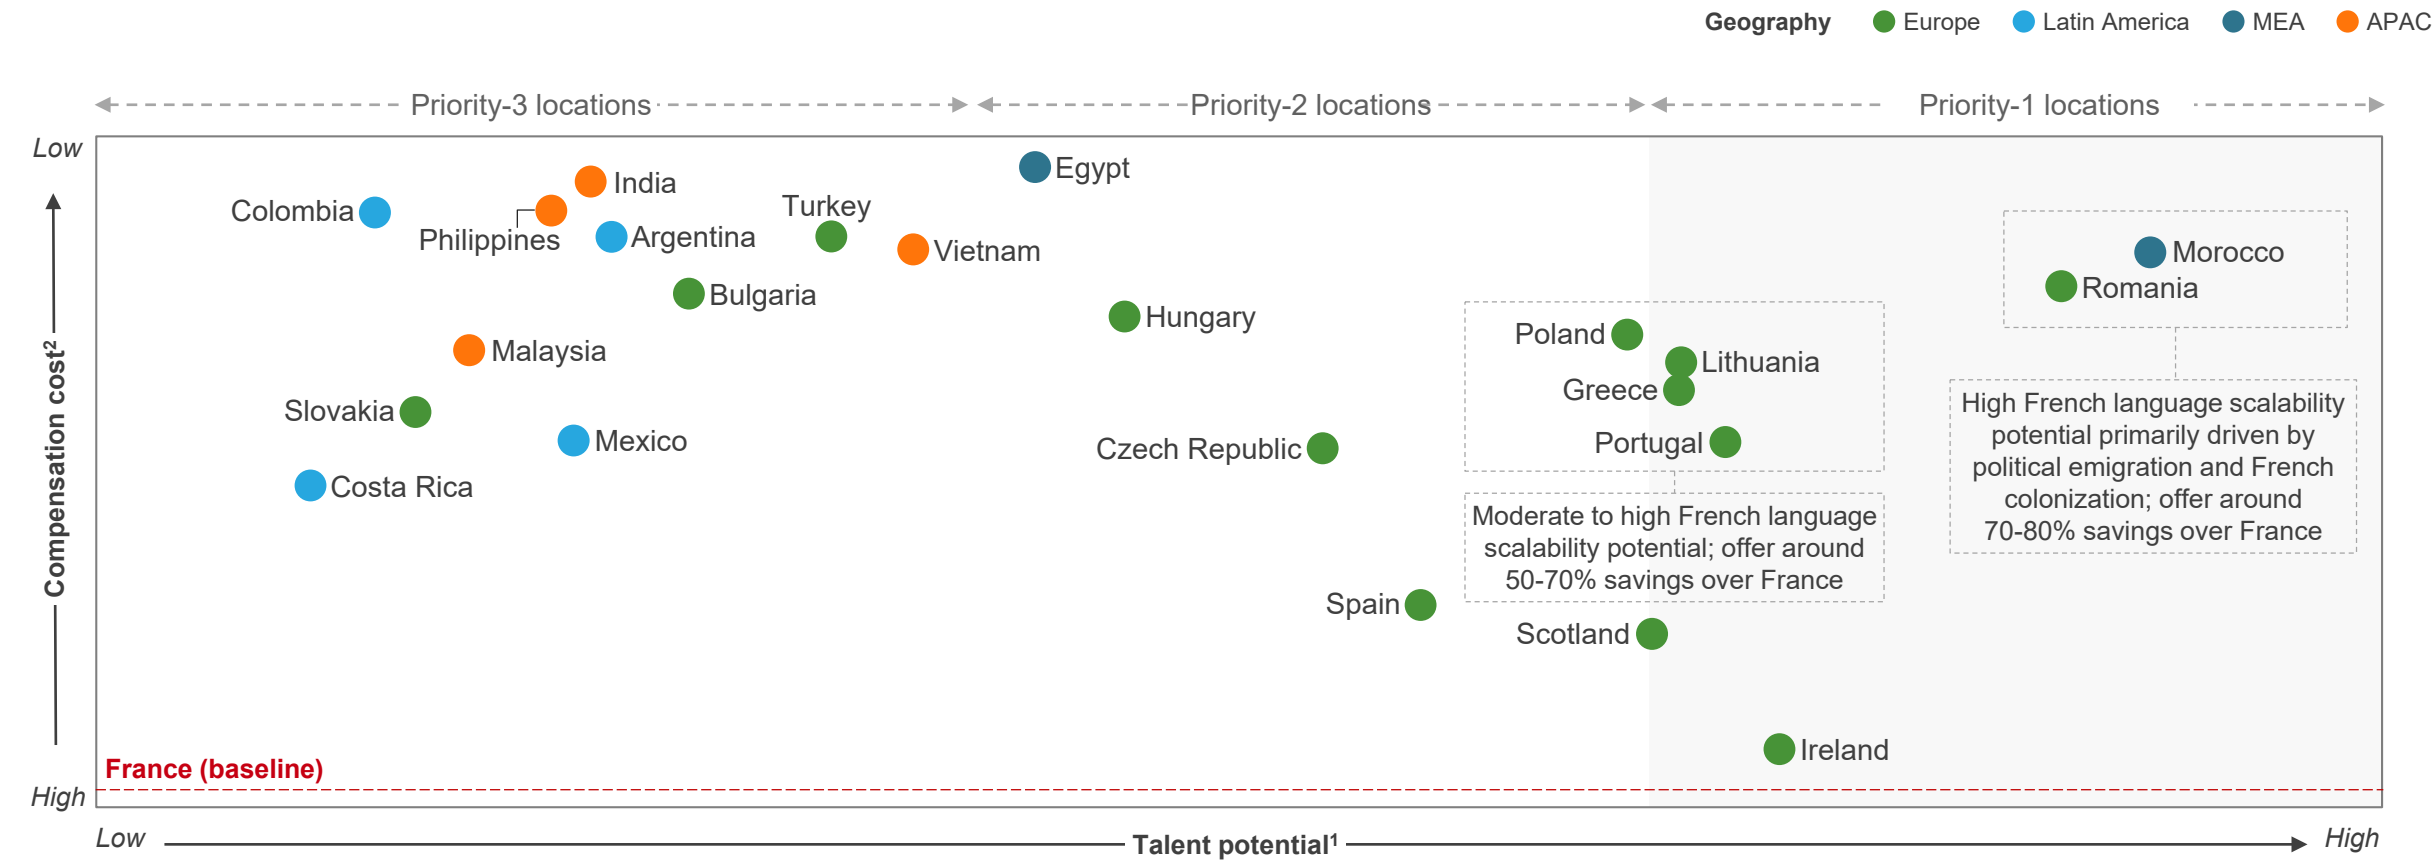

3E

French

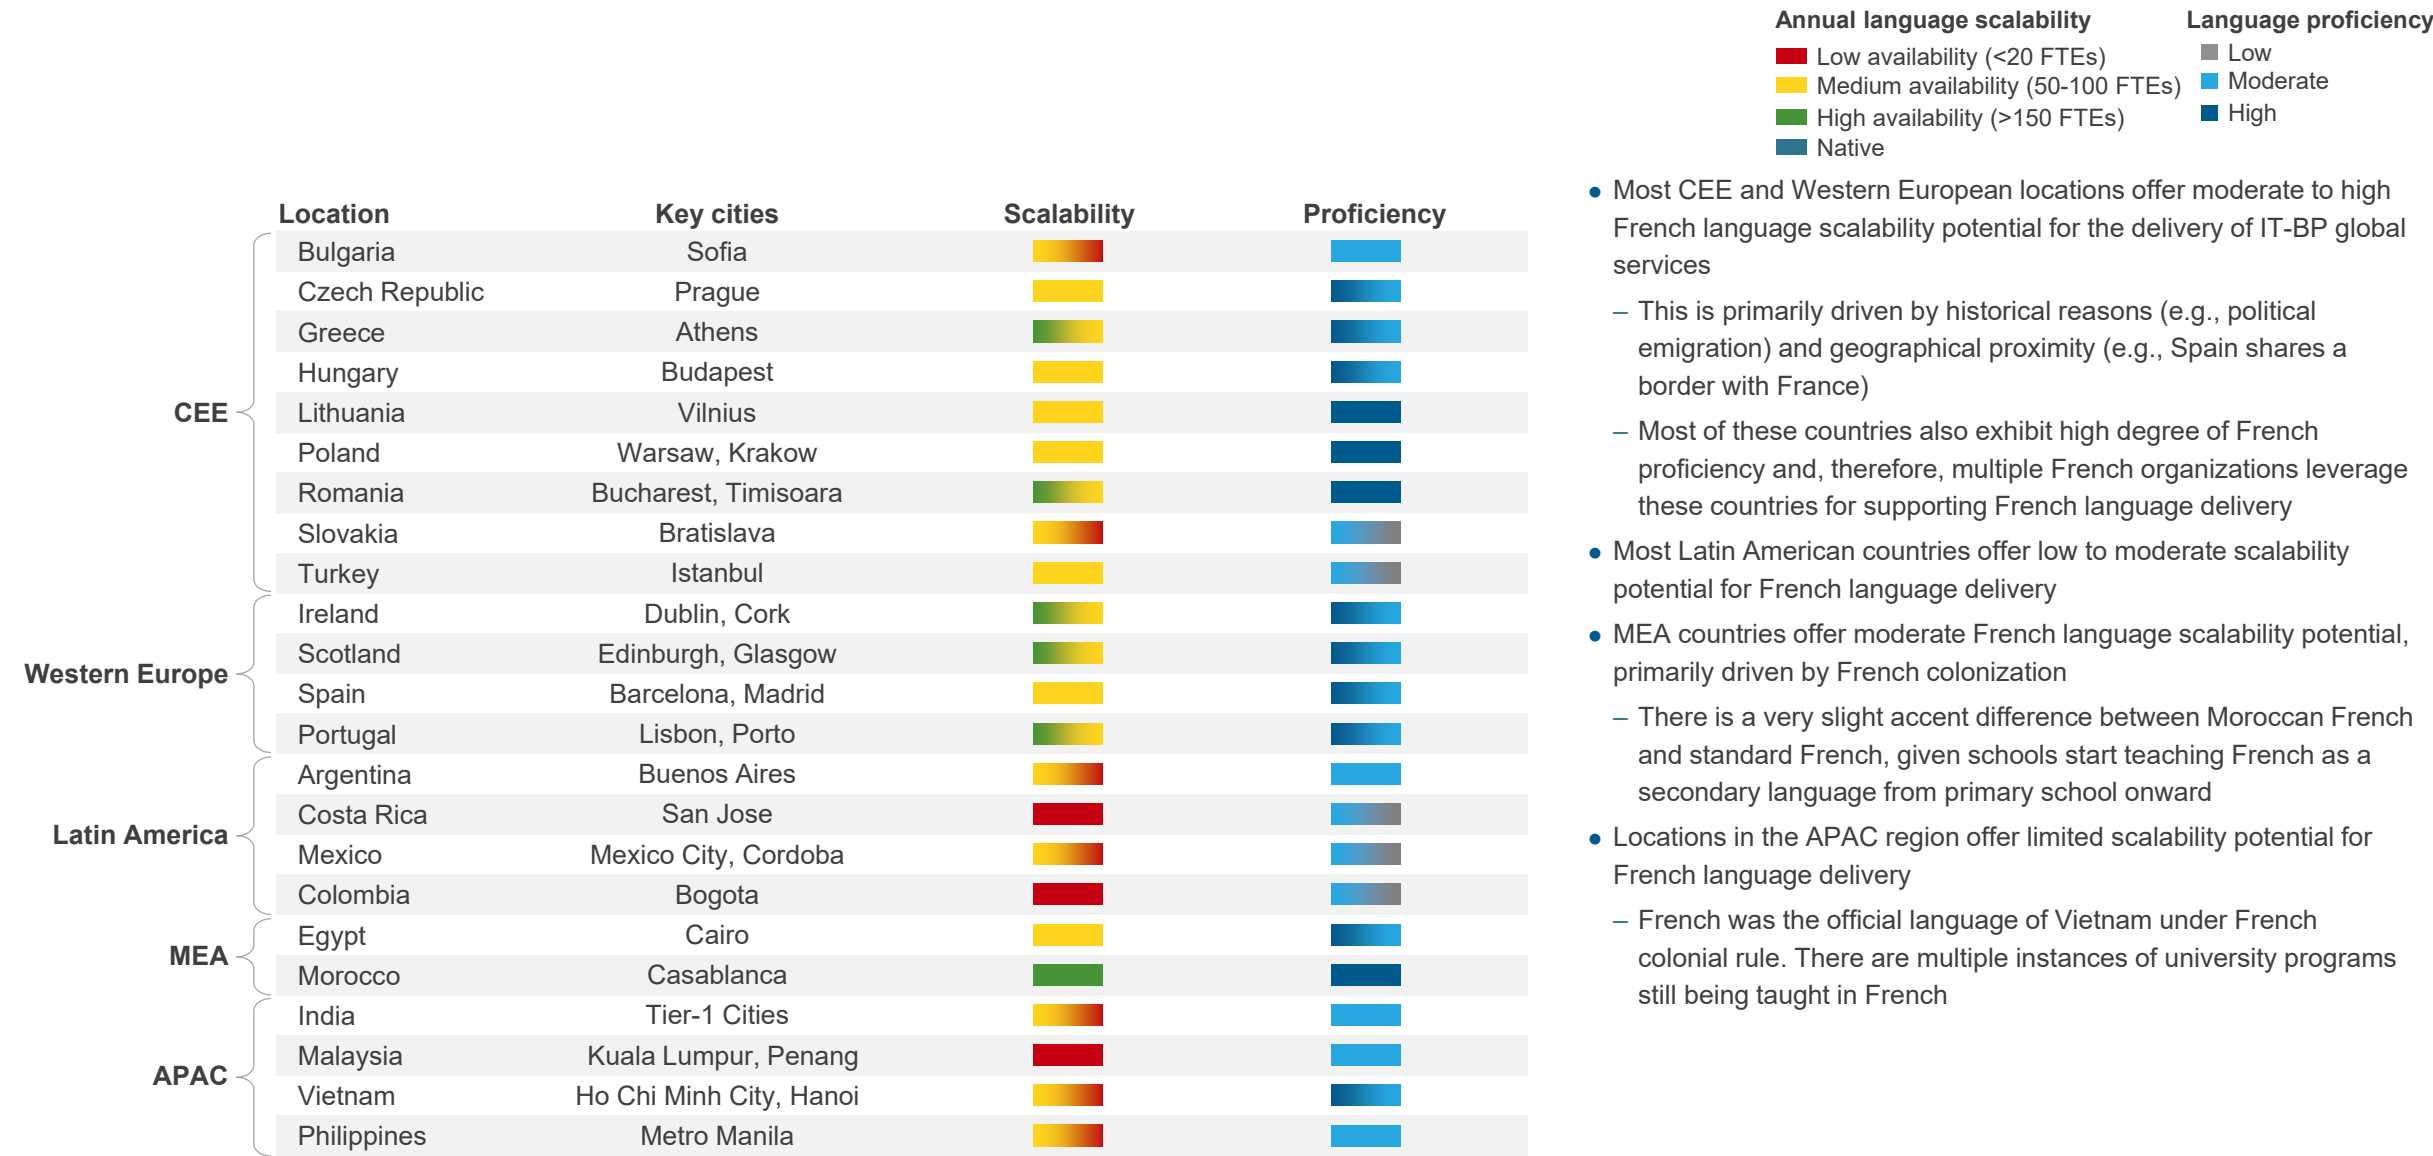

Language summary | French

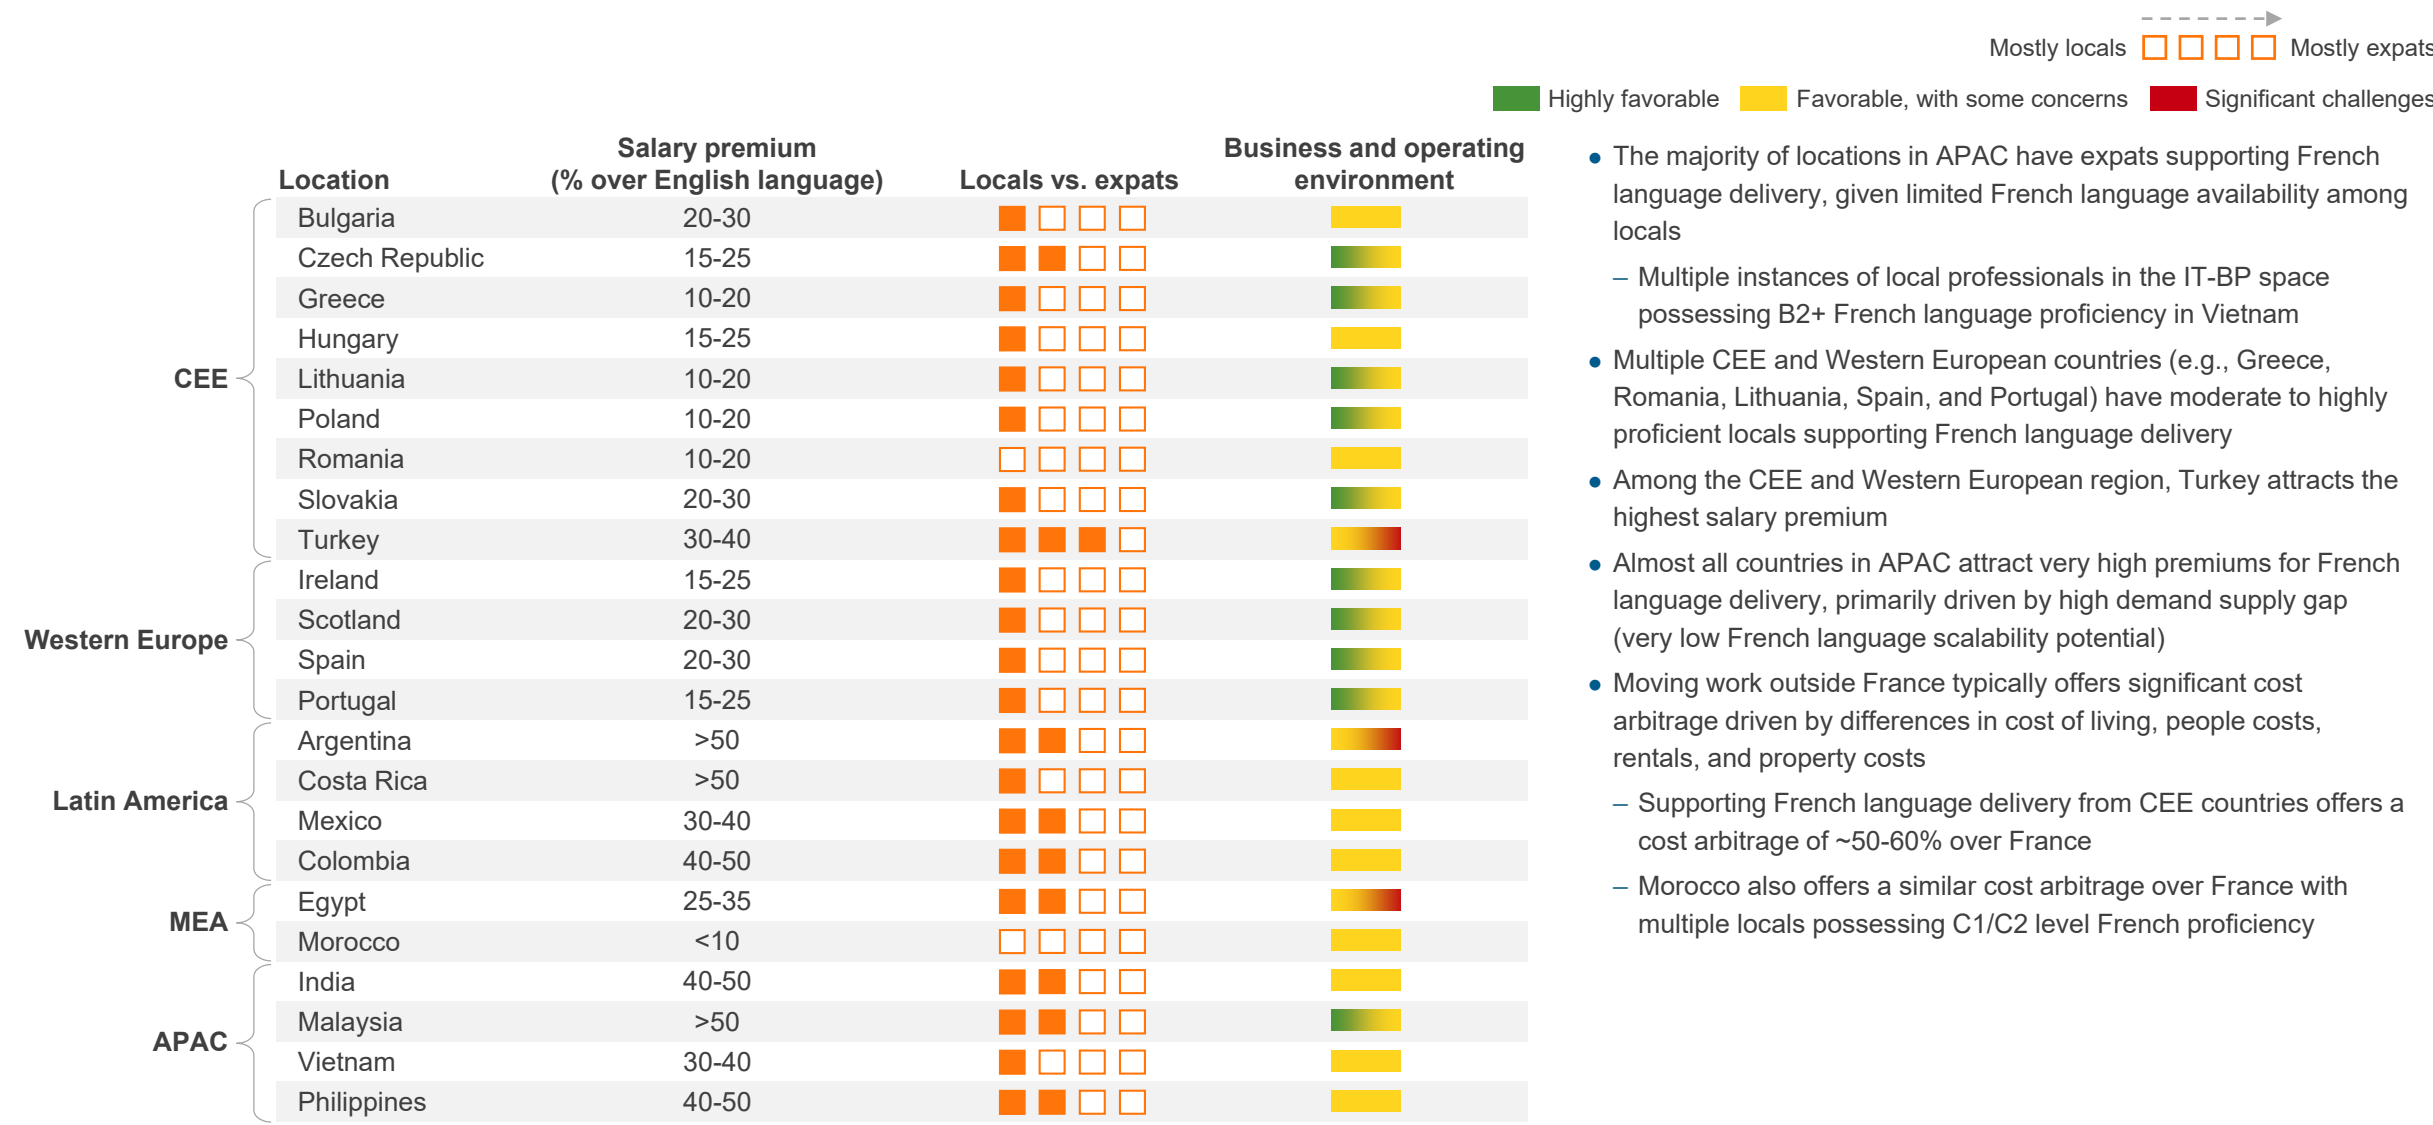

1 Talent potential is a composite metric comprising the following factors: a) annual language scalability potential and b) language proficiency in the location
2 Reflective of market average compensation for global delivery of IT-BP services in a specific language
Source: Everest Group (2023)

Language skill assessment | French (page 1 of 2)

- Most CEE and Western European locations offer moderate to high French language scalability potential for the delivery of IT-BP global services
 - This is primarily driven by historical reasons (e.g., political emigration) and geographical proximity (e.g., Spain shares a border with France)
 - Most of these countries also exhibit high degree of French proficiency and, therefore, multiple French organizations leverage these countries for supporting French language delivery
- Most Latin American countries offer low to moderate scalability potential for French language delivery
- MEA countries offer moderate French language scalability potential, primarily driven by French colonization
 - There is a very slight accent difference between Moroccan French and standard French, given schools start teaching French as a secondary language from primary school onward
- Locations in the APAC region offer limited scalability potential for French language delivery
 - French was the official language of Vietnam under French colonial rule. There are multiple instances of university programs still being taught in French

Language skill assessment | French (page 2 of 2)

3F

Italian

Language summary | Italian

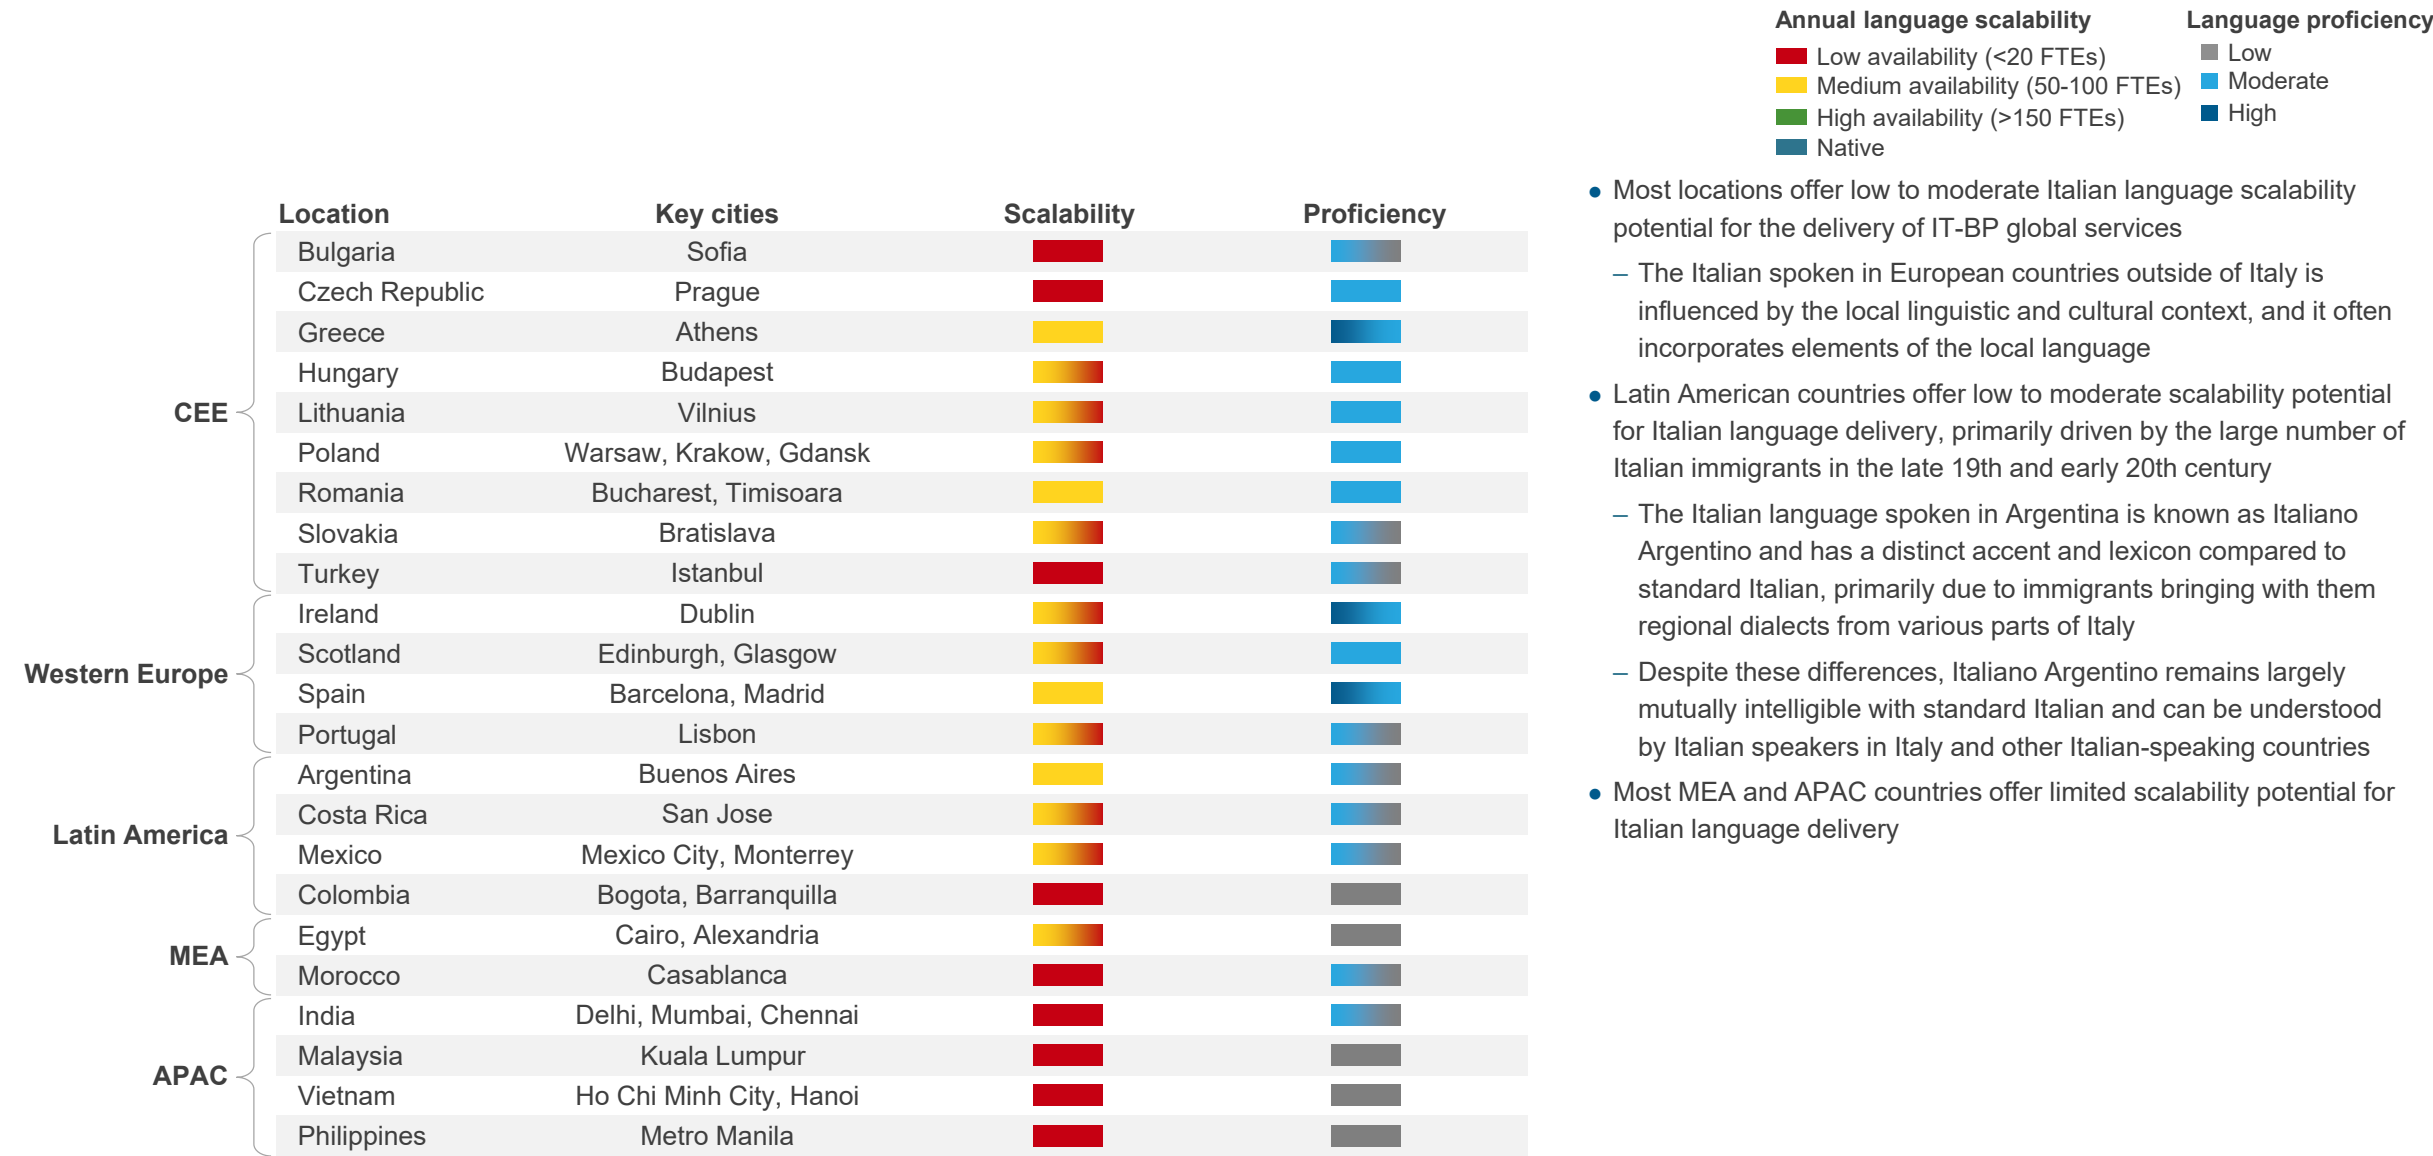

1 Talent potential is a composite metric comprising the following factors: a) annual language scalability potential and b) language proficiency in the location

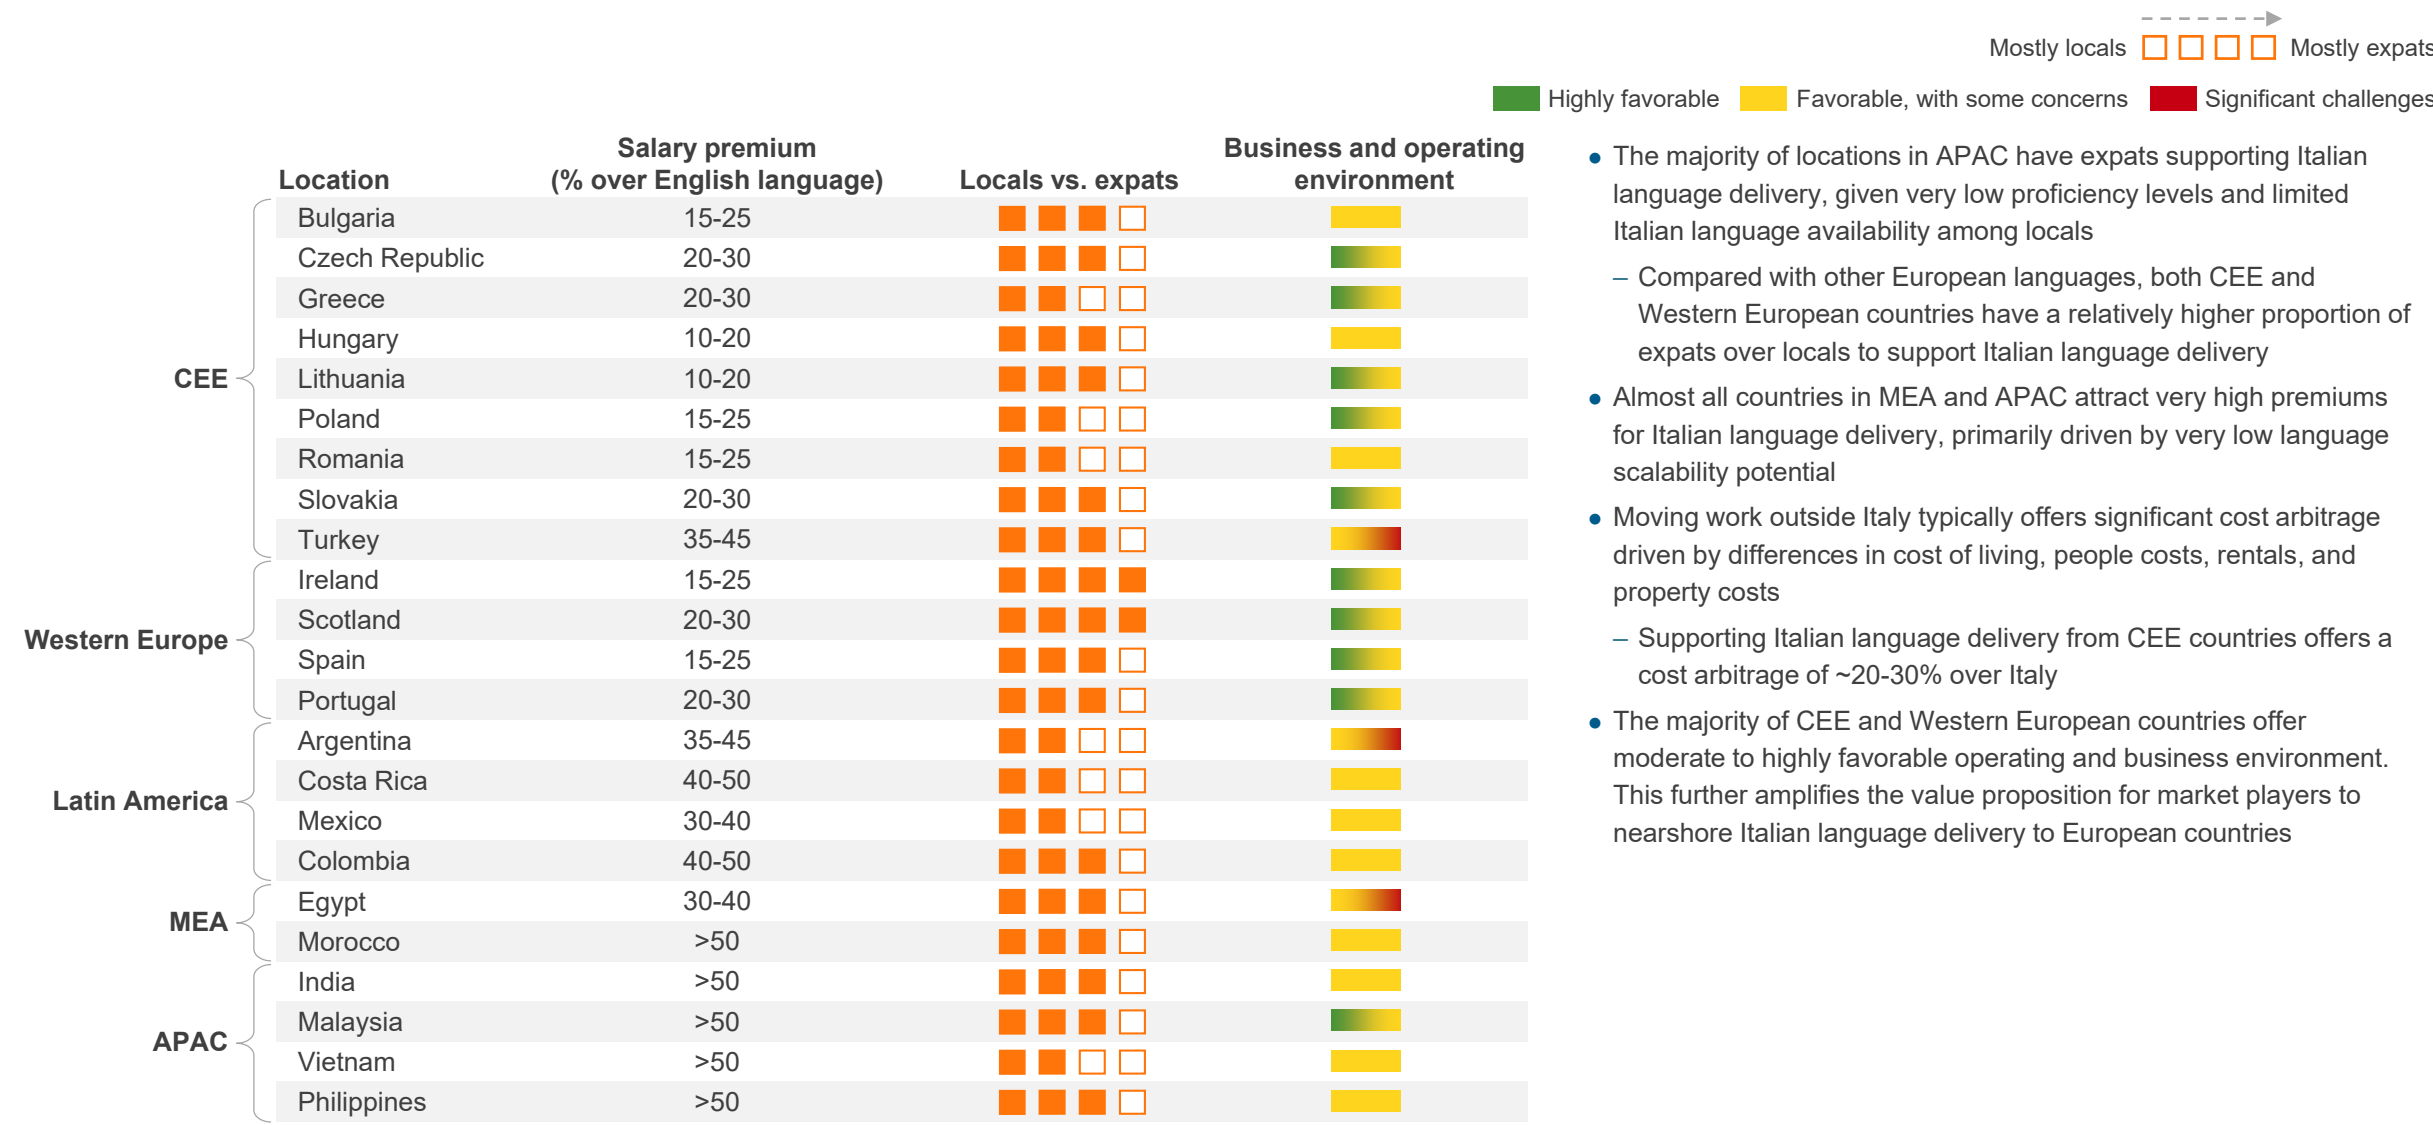

2 Reflective of market average compensation for global delivery of IT-BP services in a specific language

04

Appendix

- Operating and business environment methodology
 - Research calendar
-

Operating and business environment | methodology and key inclusions

We considered seven parameters to evaluate the overall risk across locations

Infrastructure quality

- Quality of physical infrastructure
- Quality of IT/telecom infrastructure
- Availability of IT/BP real estate

Safety and security

- Security risk
- Threat of disruption from natural disasters
- Business costs of crime and violence

Geopolitical stability

- Risk of political instability
- Threat of external intervention
- State of democracy
- Corruption levels

Ease of remote working

- Digital readiness
- Availability of nomad visa
- Availability of coworking spaces
- Level of innovation

Macroeconomic stability

- Overall macroeconomic stability
- Financial risk
- Country debt risk

Quality of life

- Access to quality medical care and education
- Environment quality
- Perception of wellbeing and happiness

Regulations and ease of doing business

- Overall legal and regulatory risk
- Strength of IP protection laws
- Ease of doing business
- Stringency of labor laws

Research calendar
